From: John Lohmeyer, T10 Chairman
Subject: T10's Response to the Public Review on BSR NCITS 335, SCSI-3 Stream Commands (SSC)

Dear Paul,

Thank you for your public review comment on NCITS BSR 333, SCSI-3 Stream Commands (SSC).

As you recommended in T10/00-159r0, T10 elected to not accept your comment in favor of considering the addition the SET CAPACITY command in SSC-2.

Per the NCITS/SD-2, Organization, Rules and Procedures of NCITS, I am required to inform you that you have 20 working days from the date of this letter to reply and indicate if your comments have not been satisfactorily resolved.

In accordance with ANSI requirements, we are advising you in this letter of the Appeals Processes, see attached.

Once again, thank you for your interest in the **SCSI-3 Stream Commands (SSC)** draft standard.

Sincerely,

John Lohmeyer

cc: Deborah Donovan, NCITS Secretariat

Appeals Processes

1) You may appeal an action of NCITS or its Secretariat, the NCITS Appeals Procedures are in Section 5.9 of the NCITS/SD-2.

2) Notification of Right to Appeal to the ANSI Board of Standards Review
(http://web.ansi.org/public/library/std_proc/anspro.html)

Please note, in accordance with BSR Procedures, those objecting to the approvals or withdrawals are hereby notified of their right of appeal. The appeal must be based on due process or lack of consensus and include a statement as to why the BSR action should be modified. The BSR will not render decisions on the relative merits of technical matters, but it shall consider whether due process was afforded technical concerns.

If you have not completed the appeals process at the standards developer, you are normally not eligible to appeal to the BSR.
