

Document: T10/00-358 revision 0  
Date: 2000-09-13  
To: NCITS Technical Committee T10, SCSI Commands, Architecture, & Protocol Working Group (CAP)  
From: Keith W. Parker <diogenes@europa.com> 1(503)255-1035  
Subject: [SSS] SCSI Socket Services status report - 2000-09-13

## **[SSS] SCSI Socket Services status report - 2000-09-13**

### ***NCITS Project T10/1246-D (closed(temporarily(kwp)))***

## **Target Nov. 2000 T10 Meeting Proposal to Re-activate Project T10/1246-D**

**Assumes “day job” project has no major surprises  
Alternate target Jan. 2001 T10 Meeting**

### **To include Revision 1 of T10/1246-D**

“big outline” in Model section to be moved into an informative annex

### **Packet transport commands modified to use only 2 SCSI commands**

### **Remote Procedure Call (RPC) to be included**

Will use Bi-Directional Data Transfer SCSI command  
ONC-RPC (Open Network Computing - Remote Procedure Call) - INITIAL  
Other RPC protocols may be supported in the future

SCSI RPC eliminates the overhead of the TCP/IP protocol stack when devices are in close enough proximity to use SCSI
