ISO/IEC JTC 1 has again changed their directives to make standards processing faster. They have adopted the project authorization change that NCITS made last year for domestic projects. New work items are now balloted only by the impacted subcommittee. In our case SC 25. RBC will be the first NWIP balloted by SC 25.

We are currently correcting some odd artifacts in the RBC draft.

The IR recommends a vote of APPROVAL OF THE DRAFT WITH COMMENTS AS GIVEN ON THE ATTACHED:

The working group recommended that changes for Vn for OR-Tied Signals (00-320) [Moore] correcting problems with SPI-3 requirements on device leakage current and terminator impedance and bias properties not be corrected in FDIS 14776-113. This recommendation translated to a vote of APPROVAL AS PRESENTED.
