**Minutes**

SRP revision 4 was submitted by the deadline set by the T10 chair. The group agreed that it is a good step forward and that a letter ballot in July is still possible.

Ed Gardner will incorporate editorial changes and any technical changes for which consensus is reached on the T10 reflector into revision 5 by 5/24/2001.

Cris Simpson will create a proposed rewrite for section 4.1 (the model section). He will ask Ed for any material he has so far and create a combined or competing proposals for that section.

Cris Simpson will ensure there are enough reserved fields for the future multichannel proposal.

George Penokie will write a SAM mapping annex.

With the June meeting or thereafter, the editor should only make technical changes when a proposal has been approved by the SRP working group (similar to the model used by SPI-4 and SPC-2, but without the plenary approval step).
