

SCSITA T10 Plenary Report

**STA Technical Committee
STA General
Address change for L&M**

SCSI Trade Association

STA Technical Committee

- **STA Technical meeting Seaside, CA - Nov 7, 2001 01S018r0**
 - **Huntington Beach - Sept 12, 2001 01S016r0**
 - **www.scsita.org/STATech**
 - **Bill Petty reviewed the timing issues, with a straw working budget for timing. Several assumptions for cable and backplane restrictions in the budget.**
 - **Ultra640 SCSI Key issues, restrictions and guidelines presentation was developed 01s014r3**
 - **SPI-6 and beyond presentation 01s005r2 addressing the encoding and restrictions for the future generations.**

Serial Point to Point Technology

- **Serial technology is currently running 2.5 gigabits per second in point to point technology**
 - LVD SCSI took what was to be EIA644 a point to point standard as the base and created a multidrop version.
 - Should we take the current point to point technologies and make them work in a multidrop environment?
 - 2.5 gigabits per second over 18 lines would create Ultra5120 SCSI bus.
- **Serial technologies are developing 10 gigabit per second copper solutions for the future generations.**

STA General

- **STA**
 - **DISKCON was in San Jose Sept 19, 20**
 - **Product data base allows non STA member product listings for a fee**
 - **Ultra640 marketing Issues were reviewed at the last meeting.**
 - **Several Articles published, RTC, CTR, EDN, IEEE, Storage Management**
 - **Next STA General meeting – Nov 8th 1:30PM – Seaside, CA**
 - **STA Marcom and STA General will have 3 focused face to face meetings; January Annual meeting – Houston, July Colorado Springs and Nov Huntington Beach.**
 - **STATech will meet at all the T10 meetings.**
