Subject: SAS external connector text corrections and signal table modification

The description of the SAS external connector has the wrong genders specified for the cable and device. Work within the SFF Committee has resulted in the elimination of the SAS-unique configuration in favor of a common, non-keyed version to be available for multiple interface applications. During the September T10 SAS PHY working group, it was determined by a unanimous vote that special keying was not required for SAS applications based on the intended applications for SFF-8470 and the mandatory AC coupling of the SAS external signals that the SFF-8470 4x configuration should be adopted as SAS external connector. The following changes represent the correction to the text required to make this update and correct the gender errors. Table 12 is also revised to provide a signal assignment that is consistent with other interface standards.

5.3.5 SAS external cable receptacle plug connector

SAS external cables shall use the SAS external cable receptacle plug connector. The SAS external cable receptacle plug connector is defined in SFF-8483 8470 as the 4x configuration with thumbscrews. It includes No special SAS keying is provided. It attaches to a SAS external plug receptacle connector, providing contact for up to four physical links.

Table 12 shows how the connector signal pairs are used for applications using one, two, three, or four of the physical links.

Physical link	Signal	Signal pin to use based on number of physical links supported by the capte				
III		One	Two	Three	Four	
1	T1+	S1	S1	S1	S1	
	T1-	S2	S2	S2	S2	
	R1+	S3	S3	\$3	S3	
	R1-	S4	S4	S4	S4	
3	T3+	N/C	N/C	S5	S5	
	T3-	NC	N/C	S6	S6	
	R3+	N/C	N/C	S7	S7	
	R3-	N/C	N/C	S8	S8	
4	T4+	N/C	N/C	N/C	S9	
	T4-	M/C	N/C	N/C	S10	
	R4+	N/C	N/C	N/C	S11	
	R4-	N/C	N/C	N/C	S12	
2	T2+	N/C	S13	\$13	S13	
	T2-	N/C	S14	S14	S14	
	R2+	N/C	S15	S15	S15	
	R2-	N/C	S16	S16	S 16	

Table 12 — Physical link usage in wide connector

Table 12 — Physical link usage in wide connector

Signal		based on roported by				
	One	Two	Three	Four		
Rx 0+	S1	S1	S1	S1		
Rx 0-	S2	S2	S2	S2		
Rx 1+	N/C	S3	S3	S3		
Rx 1-	N/C	S4	S 4	S4		
Rx 2+	N/C	N/C	S5	S5		
Rx 2-	N/C	N/C	S6	S6		
Rx 3+	N/C	N/C	N/C	S7		
Rx 3-	N/C	N/C	N/C	S8		
Tx 3-	N/C	N/C	N/C	S9		
Tx 3+	N/C	N/C	N/C	S 10		
Tx 2-	N/C	N/C	S11	S11		
Tx 2+	N/C	N/C	S12	S12		
Tx 1-	N/C	S13	S13	S13		
Tx 1+	N/C	S14	S14	S14		
Tx 0-	S15	S15	S15	S15		
Tx 0+	S16	S16	S 16	S16		
G1-G9: SIGNAL GROUND						

Housing: CHASSIS GROUND

Notes:

- a) N/C: Not connected
- b) On cable assemblies, the Tx signal from one connector shall be connected to the corresponding Rx signal of the other connector (i.e., Tx0+ (S16) of connector 1 shall connect to Rx0+ (S1) of connector 2).
- c) SIGNAL GROUND shall not be connected to CHASSIS GROUND in the cable or cable connector.

5.3.6 SAS external plug receptacle connector

SAS devices with external ports shall use the SAS external plug receptacle connector. The SAS external plug receptacle connector is defined in SFF-8483 8470 as the 4x configuration with thumbscrews. It includes No special SAS keying is provided. It attaches to a SAS external cable receptacle plug connector, providing contact for the up to four physical links.

5.4.2 SAS external cables

The SAS external cable is connectors are defined in SFF-8483 8470 as the 4x configuration with thumbscrews. The external cable does not carry power signals (including READY LED).

Although the connector always supports four physical links, the cable may support one, two, three, or four physical links.
