

Obsolete Medium Partition mode pages(2-4)

(T10/03-031r0)

Dave Peterson, Cisco Systems, Inc.

SSC-2 currently specifies four Medium Partition mode pages (11h, 12h, 13h, 14h). Medium Partition mode page(1) - 11h allows for a maximum of 124 partitions. Medium Partition mode pages(2-4) specify medium partitions numbered from 64 to 255. At this time there are no known or planned implementations that even approach supporting 64 partitions. In addition, the Medium Partition mode page(4) code point 14h conflicts with the SES Enclosure Services Management mode page (14h).

The proposed mode pages targeted for obsolescence in SSC-3 and SPC-3 are as follows:

Medium Partition mode page(2) - 12h

Medium Partition mode page(3) - 13h

Medium Partition mode page(4) - 14h

Obsolete Medium Partition mode pages(2-4)
