From: Ralph O. Weber
Subject: FCP-3 & Optional Headers

FCP-3 r03c might be read as prohibiting the use of ESP Headers ... or any other optional headers.

To clarify this, the following changes are proposed:

5.4.2.8 DF_CTL

The bits in the DF_CTL field indicate any optional headers that may be present. The Fibre Channel protocol does not ~~use~~ **require the use of** any optional headers.
