Date: 14 September 2004
To: T10 Technical Committee
From: Ralph O. Weber
Subject: FCP-3 & Optional Headers

FCP-3 is not clear regarding allowable optional headers.

To clarify as per the 14 September working group recommendations, the following changes are proposed:

5.4.2.8 DF_CTL

The bits in the DF_CTL field indicate any optional headers that may be present. ~~The Fibre Channel protocol does not use any optional headers.~~ The DF_CTL field shall be set to 00h (i.e., no optional headers) or 40h (i.e., Encapsulating Security Payload).
