4.1.6 SAM-4 SAS-1.1 I_T NEXUS LOSS task management function (04-372) [Elliott]

Rob Elliott reminded the group that a proposal to define a task management function to simulate logout for SAS (04-372r1) is on the agenda for consideration in the CAP working group. Rob summarized the contents of the proposal and concluded by stating that the vote recommending the proposal will be taken in the CAP working group.

4.1.7 SAM-4 SAS-1.1 Task priority cleanup (04-376) [Elliott]

Rob Elliott reminded the group that a proposal to incorporate task priority in the SAS state machines and in SAM-4 protocol services (04-376r1) is on the agenda for consideration in the CAP working group. Rob reviewed the SAS contents of the proposal in detail and concluded by stating that the vote recommending the proposal will be taken in the CAP working group.

5. New Business

5.1 SAS 1.1 External Connector Interoperability (05-010) [Fairchild]

Steve Fairchild presented a proposal to correct problems with interconnecting devices with 4-way external connectors (05-010r0). He reminded the group that the issues motivating the proposal were discovered during the STA-sponsored November Plugfest. The group requested several substantial changes and Steve agreed to prepare a new revision of the proposal for consideration by the next meeting.

5.2 SAS-1.1 Discover process disable unused entries (05-018) [Elliott]

Rob Elliott presented a proposal to enhance the discovery process to cleanup routing table entries that have become unconfigured (05-018r0). Concerns were raised about increases in the SMP message traffic that could result from the proposed changes. The group requested minor changes and Rob agreed to prepare a new revision.

Rob Elliott moved that 05-018r1 (r0 as modified) be recommended for inclusion in SAS-1.1. Steve Johnson seconded the motion. In the absence of any objections, the motion passed unanimously.

5.3 SAS-1.1 Credit-based starvation (05-024) [Elliott]

Rob Elliott presented a proposal whose goal is eliminating a live lock condition in the arbitration fairness algorithm (05-024r0). The group agreed that a 'shall' requirement needed to be changed to a 'should', based on requirements present in SAS-1. Rob agreed to prepare a new revision of the proposal.

Rob Elliott moved that 05-024r1 (r0 as modified) be recommended for inclusion in SAS-1.1. Dan Colegrove seconded the motion. In the absence of any objections, the motion passed unanimously.

5.5 ACK/NAK balance check (05-039) [Sheffield]

Bob Sheffield presented a proposal to remove an impossible testing requirement from SAS-1.1 (05-039r0). The group requested a minor change and Bob agreed to prepare a new revision of the proposal.

Rob Elliott moved that 05-039r1 (r0 as modified) be recommended for inclusion in SAS-1.1. Mark Evans seconded the motion. In the absence of any objections, the motion passed unanimously.

5.6 SAS-1.1 Schedule and working draft review [Elliott]

Rob Elliott led the group in a review of SAS-1.1 issues. Rob noted several changes that will be made in the next revision of SAS-1.1.

The group discussed the schedule for sending SAS-1.1 to letter ballot. It was noted that the protocol group (this group) is mostly ready for the letter ballot. Concerns were raised over how fast the SAS PHY group can be ready with 3 Gbs definitions.

The group agreed to hold a three-hour interim telephone conference call on Wednesday, 16 February, starting at 10:00 a.m. central time.
