Seagate-001	E		Global	Globally, The word protocol in: Fibre Channel Protocol is sometimes capitalized and sometimes not. The use of a capital Protocol better differentiates that the protocol defined by this standard is being referenced	Change all Fibre Channel protocol to Fibre Channel Protocol			
Seagate-002	E	9	4.10	If FC-FS-2 is being used, this reference should be FC-AL-2. Note, FC-AL-2 is used in other places in the document.	Change references from FC-AL to FC-AL-2. A global change would be good.			
Seagate-003	E	17	4.10	In Table 4, the text in the table notes is running into the border on the right side.	change format?			
Seagate-004	E	18	4.12	A reference after Reset LIP(y,x) would be beneficial	Add a reference to FC-AL-2			
Seagate-005	E	18	4.12	In Table 5, the text in the table notes is running into the border on the right side.	change format?			
Seagate-006	E	19	4.15	The last sentence is not really related to the other text in this clause. 4.13 needs a comment about implicit login.	Delete this sentence in 4.15 and add in 4.13			
Seagate-007	E	20	5.2	In the second sentence . . . by FC-FS-2 and its extensions. What are extensions?	Suggest deleting "and its extensions"			
Seagate-008	E	20	5.3	This does not convey that FC_DATA IUs may be multiple frame sequences. If FC_DATA IUs were required to be single frame sequences, they would satisfy this statement.	Add text to 9.3.1 FCP_DATA IU. See Seagate-009
