To: INCITS Technical Committee T10 From: Kevin Butt, IBM Date: March 5, 2006 9:15 pm Document: T10/06-138r0 Subject: SPC: Log Page subpages

1. Revisions

2. Introduction

In response to the ISV Feedback this is a proposal for how to modify the TapeAlerts and specifcy which are hardware, which are software, and which are firmware. I am also taking this opportunity to specify when the device server will recognize the condition as having gone away and clear the specific tapealert.

3. Proposal

A.1 TapeAlert log page parameter codes (flags)

Table A.1 specifies the TapeAlert log page parameter codes and associated information.

In Table A.1 the following keywords are used:

O = optional M = mandatory C = critical W = warning I = informational Hw = Hardware Me = Media Op = Operational Information

Fw = Firmware

Parameter Code	Description	Set	Clear ¹	Туре	Class	Severity
01h	Read Warning (Performance Reduction)			0	Me	Warning
02h	Write Warning (Capacity Reduction)			0	Me	Warning
03h	The operation has stopped because an error has occurred while reading or writing data which the drive cannot correct.		R	М	Me	Warning
04h	Media can no longer be written or read, or perfor- mance is severely degraded.		R	М	Me	Critical
05h	Read Failure.		R	М	Me?	Critical
06h	Write Failure.		R	М	Me?	Critical
07h	Media Life		R	0	Me	Warning
08h	The cartridge is not data-grade.		R	0	Me	Warning
09h	The WRITE command was attempted to a write- protected tape.		R	0	Ор	Critical
0Ah	A manual or software unload was attempted when Prevent Media Removal was on.		R	0	Ор	Informational
0Bh	The tape in the drive is a cleaning cartridge.		R	0	Op?	Informational
0Ch	You attempted to load a cartridge with an unsup- ported tape format (for example, Ultrium 2 car- tridge in Ultrium 1 drive)		R	0	Me?. Op?	Informational
0Dh	Recoverable mechanical cartridge failure			0	Me	Critical
0Eh	Unrecoverable mechanical cartridge failure			0	Me	Critical
0Fh	The memory chip failed in the cartridge.		R	0	Me	Critical
10h	The operation has failed because the tape cartridge was manually ejected while the tape drive was actively writing or reading.		L	0	Op	Warning
11h	Media loaded is Read-Only format.	Е	R	0	Op	Informational
N/A Not set/ L Load -me C Clean -cle	et/Cleared when: /supported dium is loaded eaner tape is loaded nedium is ejected					

U Unload -medium is ejected

E Error -error code is posted

R Removal -medium is fully removed (No longer can be sensed)

S Sensor -sensor check

Notes:

1. All TapeAlerts are cleared on POR/Reset.
