FROM: Paul A. Suhler, Quantum Corporation
DATE: 6 November 2006
SUBJECT: T10/06-425r1, Features for ADC-3 and ADT-3

Revision 1:

- Fast Access over non-ADT transports
- SAM-4 and SPC-4 compliance

Revision 0:

- Passthrough bridging
- Progress indication
- Utilizing physical device model

General

In the development of the second generation Automation Drive Interface standards, ADC-2 and ADT-2, a number of concepts were discussed which were of insufficient urgency to include in the first generation standards. This document lists those concepts and the affected standards, as well as the documents and meeting minutes which present the most-fully developed presentation of the concepts.

Status of Items

Open
