T10 Week at:
Atrium Suites Hotel, Las Vegas, NV
Sponsored by Hitachi Global Storage

1.   Opening Remarks

The MMC meeting has been authorized by INCITS T10 and will be conducted under the INCITS rules. Ad hoc meetings take no final actions, but prepare recommendations for approval by the INCITS task group. The voting rules for the meeting are those of the parent committee, INCITS T10. For the ad hoc, other than straw votes, the voting rules are: one vote per participating company.

The minutes of the MMC meeting will be posted to the T10 Reflector and will be included in the next T10 committee mailing. Attendance at a working group meeting does not count toward minimum attendance requirements for T10 membership. Working group meetings are open to any person or company to attend and to express their opinion on the subjects being discussed.

2.   Introductions

Keiji Katata	Pioneer
Takaharu Ai	Panasonic
Bill McFerrin	Philips
David Walp	Microsoft
Shunsuke Kimura	Toshiba
Kenji Yoshihara	JVC
Masaetsu Takahashi	Ricoh
Akio Yamazaki	Sony-NEC-Optiarc

3.   Document Distribution

MMC-5 Review by ANSI editor
MMC5R04.PDF

4.   Call for Patents

5.   Approval of Agenda

David Walp has questions.

6.   Old Business

The errata corrected, ANSI reviewed version of MMC-5 (rev 4) will begin its march to standardization during this month's T10 plenary.

David Walp asked for clarification on some issues.
1. START/STOP UNIT command description is missing what to do in the case that a "tray type" mechanism does not support a "Load" function. Fuji states that the command should be terminated with CHECK CONDITION status and sense shall be set to ILLEGAL REQUEST/INVALID FIELD IN CDB (5/24/00). To be fixed in MMC6. Katata-san suggests that (after the fix) both documents should document this command in the same way.

2. DVD+R and DVD+R DL profiles appear current when DVD+R DL media is present. Is this permitted? The DVD+R DL Feature description does not permit that behavior.

3. DVD+RW and DVD+R profiles are always present in a (particular) DVD-ROM drive. The profiles never become current. Is this permitted?

It is permitted, but it is silly. In MMC6 (and Fuji7), a recommendation must be included to avoid this behavior.

The T10 plenary must decide to either continue or release MMC as an ANSI standard. There was no objection to release MMC.

The T10 plenary must decide to either continue or release MMC3 as an ANSI standard. There was no objection to continue MMC3.

7. New Business

MMC6R00.PDF/DOC is available to the next editor.

A new MMC WG chair must be selected by the T10 chair. The T10 chair will choose according to recommendations from the MMC WG. The MMC6 editor(s) is to be selected by the new MMC WG chair.

No volunteers - yet. We will tell that T10 plenary that MMC WG meetings will be suspended until a decision is made. The MMC6 project is suspended until that time.

8. Future Meeting Schedule

The January 2007 T10 week is at:

Orlando Marriott Lake Mary Hotel
1501 International Parkway
Lake Mary, Florida 32746 USA
Phone: 1-407-995-1100, Fax: 1-407-995-1150

Hosted by Symantec.

MMC and Mt Fuji will request a meeting room for January 16 and 17 (Tuesday and Wednesday). There may not be a formal MMC WG meeting.

9. Adjournment

We thank Dan Colegrove and Hitachi Global Storage for sponsoring our meeting.
