 Subject: LOG SELECT CDB page/subpage field usage in SPC-4

The table defining the usage of the page code field and subpage code field in LOG SELECT CDBs covers the 00h/00h combination twice.

Proposed SPC-4 changes (reference r09):

Table 95 — PAGE CODE field and SUBPAGE CODE field

PAGE CODE field	SUBPAGE CODE field	Description
00h	00h	All log parameters in all log pages <Superscript>a
00h - 3Fh	01h 00h - FEh	All log parameters in the log page specified by the page code and subpage code
00h - 3Fh	FFh	All log parameters in the log pages specified by page code and all subpage codes
01h - 3Fh	00h	All log parameters in the log page specified by the page code
a This is equivalent to the LOG SELECT command operation specified by previous versions of this standard.
