Title Information technology - Small Computer System Interface— Part: 326 Reduced Block Commands (RBC), 2nd Edition, 14776-362
Scope - This standard defines a Reduced Block Command set for logical block devices. The Reduced Block Commands along with the required SPC-2 commands and their restrictions described in this standard, fully specify the complete command set for RBC logical block devices.
Purpose and justification – The purpose of this document is to provide a command set of reduced requirements and options from SCSI Block Commands (SBC) (ISO/IEC 14776-321) for block devices. The reduced command set is intended to more closely match the functionality required for simple block logical units. The specified commands place no restrictions on device performance. The initial focus of this command set was rigid disks and removable media devices attached to Serial Bus and utilizing SBP-2 (ISO/IEC 14776-232) for command and control. This document is a revision to 14776-362 which will add new details and correct errors in the first edition
