

TO: T10 Membership
FROM: Paul Suhler, Quantum Corporation
DATE: 14 January 2008
SUBJECT: T10/08-067r0, ADI-2 Working Group Report to Plenary, January 2008

General

The Automation/Drive Interface – 2 working group met in Santa Ana, California, on 14 January 2008 from 9:02 AM until 1:12 PM. There were eleven participants representing seven companies. The minutes have been posted as 08-042r0.

We again issued a call for a new secretary to assume Michael Banther's duties following the January 2008; there have been no volunteers at this time. There was interest in having the secretary being a rotating position. The group thanked Michael for his five years of service as Secretary.

ADC-3 Status

The group reviewed one proposal for ADC-3 (00-029r0, Automation encryption control, Ballard). The author will revise it and it will be reconsidered at the next teleconference.

ADT-2 Status

The working group did not have time to discuss the ADT-2 proposals. They will be discussed at the next teleconference, after completion of the Automation Encryption Control proposal.

ADT-3 Status

A project proposal for ADT-2 (08-054r0) has been posted. As it did not meet the two-week rule, it will not be eligible for consideration by the Plenary until March 2008.

Future Meetings

We request permission to hold two teleconferences before the next plenary week: 30 January (hosted by HP), and 13 February (hosted by Quantum), 8:00 AM – 10:00 AM PST each day.

Meeting requirements for March will be for the ADI-2 meeting to begin upon completion of the SMC-3 meeting and to end at 7:00 PM.
