SUBJECT:　 T10/08-226r0, ADC-3: Add Port and Node Name to Fibre Channel Port Status Data

1　Revisions

0　　Initial revision (5 May 2008)

Unless otherwise indicated additions are shown in blue, deletions in ~~red strikethrough~~, and comments in green.

2　General

ADC-2 letter ballot comment HPQ-206 requested adding the Port_Name and Node_Name to the Fibre Channel Port status data in the DT device primary port status log parameter.

3　Changes

3.1　*Changes to clause 6.1.2.6.2*

3.1.1　Change to Table 27:

Bit / Byte	7	6	5	4	3	2	1	0
0	CURRTOP	CURRENT SPEED			LC	CONFLICT	SIGNAL	PIC
1	(MSB)	CURRENT N_PORT_ID						
3								(LSB)
4		Reserved						
6								
7	Reserved	CURRENT FC-AL LOOP ID						
8		CURRENT PORT NAME						
11								
12		CURRENT NODE NAME						
15								

Add the following two paragraphs at the end of clause 6.1.2.6.2:

The CURRENT PORT NAME field contains the DT device's primary port name identifier (see FC-FS).

The CURRENT NODE NAME field contains the DT device's primary node name identifier (see FC-FS).
