RE: Resolution of comments received the FCP-2 Project Proposal

July 11, 1995

Seagate Technology (Gene Milligan):

The following comments accompany Gene Milligans YES vote on the proposed new project for FCP-2:

1) This is not a SCSI-2 project. Either change SCSI-2 to SCSI-3, SCSI-4, or SCSI. Alternatively change the title to Fibre Channel Protocol - 2 for SCSI (FCP-2).

Accepted.

2) In the needs delete and harmonize the document with other SCSI-3 standards.

Accepted.

3) The second paragraph in needs may be an appropriate thing to do during the project but it should be deleted from the needs.

Accepted

4) Item (a) in 2.2 may be an appropriate thing to do during the project but it should be deleted from the candidates.

Accepted.

5) Although the title indicates duration either delete the durations or make them more flexible.

Accepted.

6) In 5.1 and 5.5 delete SCSI-2.

Accepted.

7) In 5.2 add FC-AL, FC-PH2, and the SCSI-3 command sets.

Accepted; add FC-AL-2, FC-AL, FC-PH, FC-PH-2, SAM, FCP, SPC.
