

Fast 40 Proposal  
David McCall - Quantum

**Add an option to allow 50 ohm signals and Cables**

- Raid boxes are difficult to match to 100 ohm cables
- Risk of half levels is high
- 50ohm cables match raid boxes well and eliminate half level risk
- Cables can be smaller at 50 ohms
- Backplanes can be more dense at 50 ohms
- Small signal swings beng proposed are compatible with 50 ohms

SCSI Simulation Configuration

**Table 1: Simulation Cases**

Case	Cable Zo	Cable length to box	Cable length box to box	Box Foil Zo	Stub length	Stub separation	Stub Capacitance	Termination
F20 100 ohms tight	100	3m	0.6m	60	15cm	5cm	30pf	Diff 105
F20 50 ohms tight	50	3m	0.6m	60	15cm	5cm	30pf	Diff 55
F20 100 ohms loose	100	3m	0.6m	100	15cm	30cm	22pf	Diff 105
F40 100 ohms tight	100	3m	0.6m	60	15cm	5cm	30pf	100
F40 50 ohms tight	50	3m	0.6m	60	15cm	5cm	30pf	60
F40 100 ohms loose	100	3m	0.6m	100	15cm	30cm	22pf	100

DIFF SCSI WITH 1000HM CABLE TO 16 DRIVES

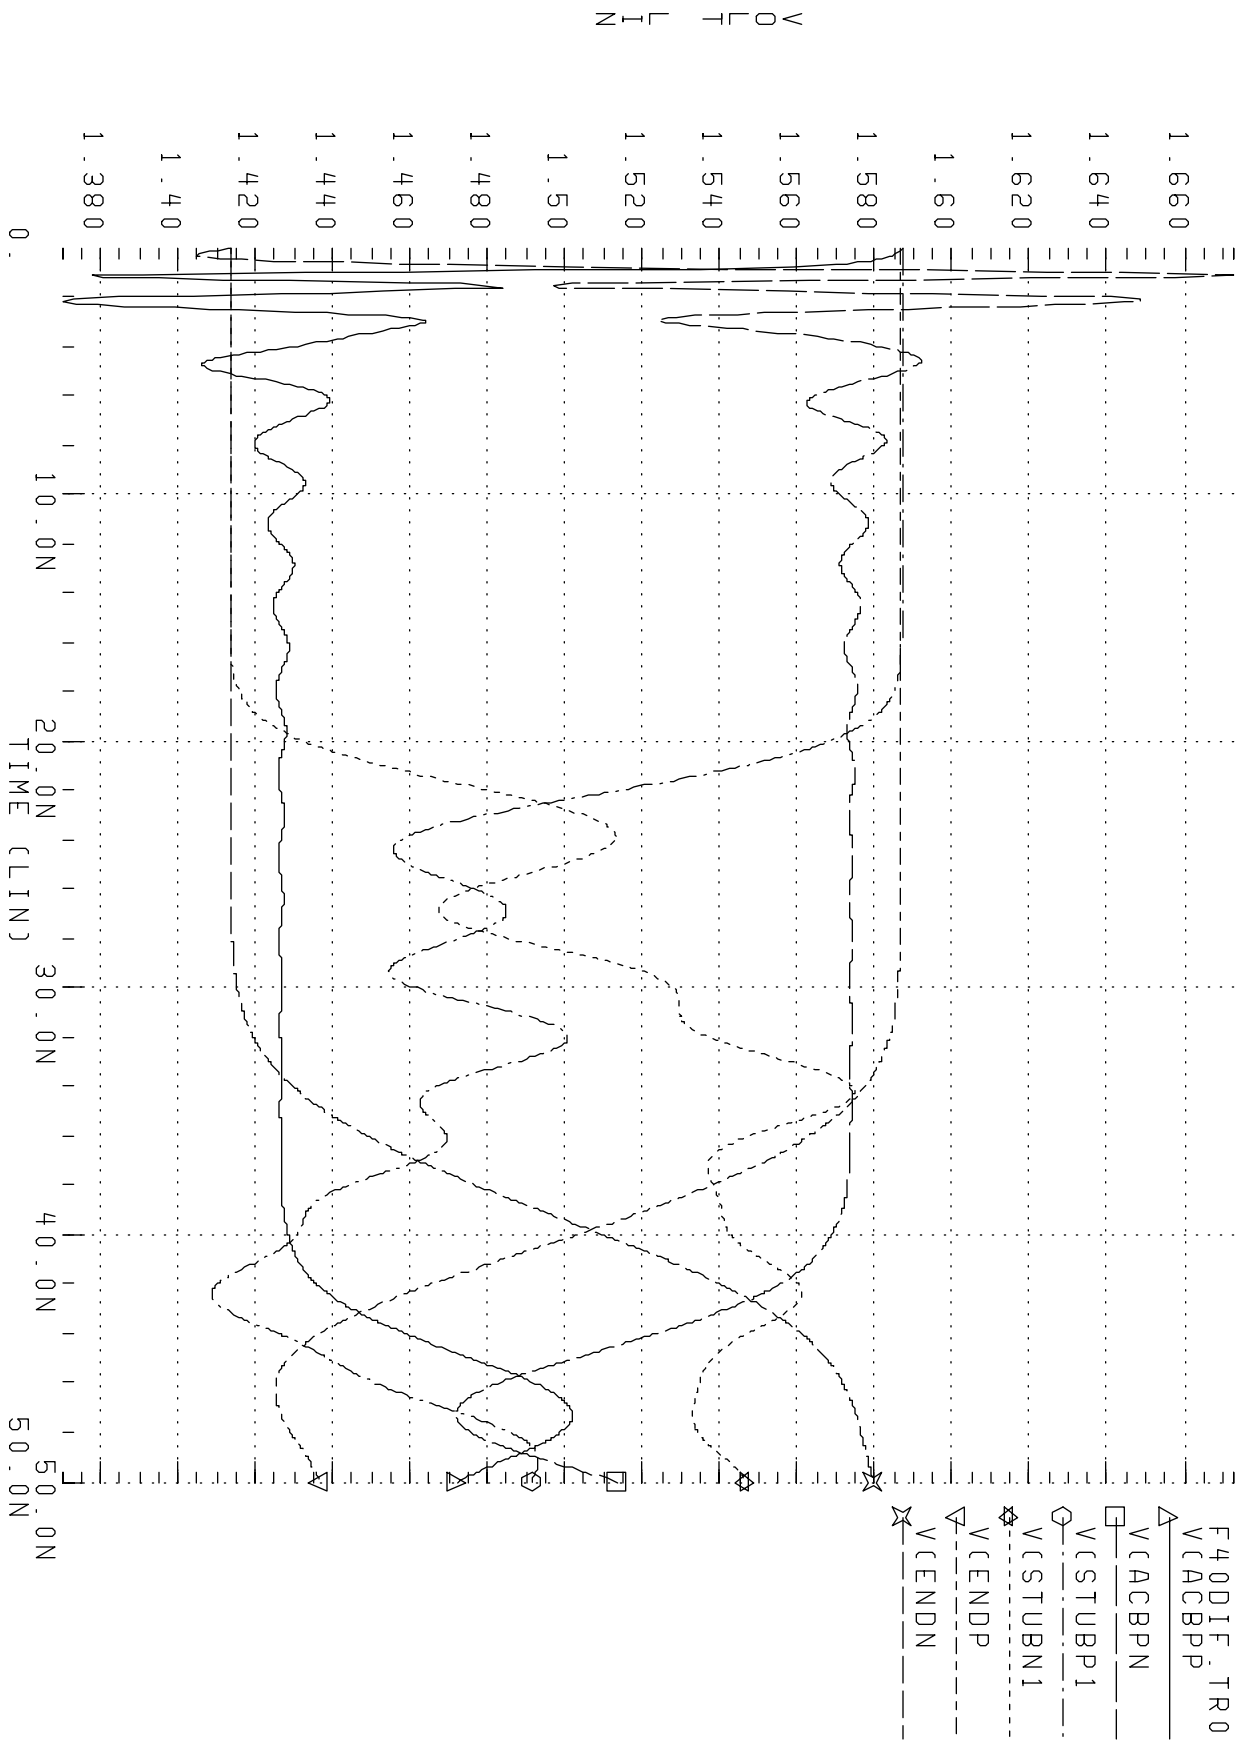

DIFF SCSI WITH 50 OHM CABLE WITH 16 LOADS

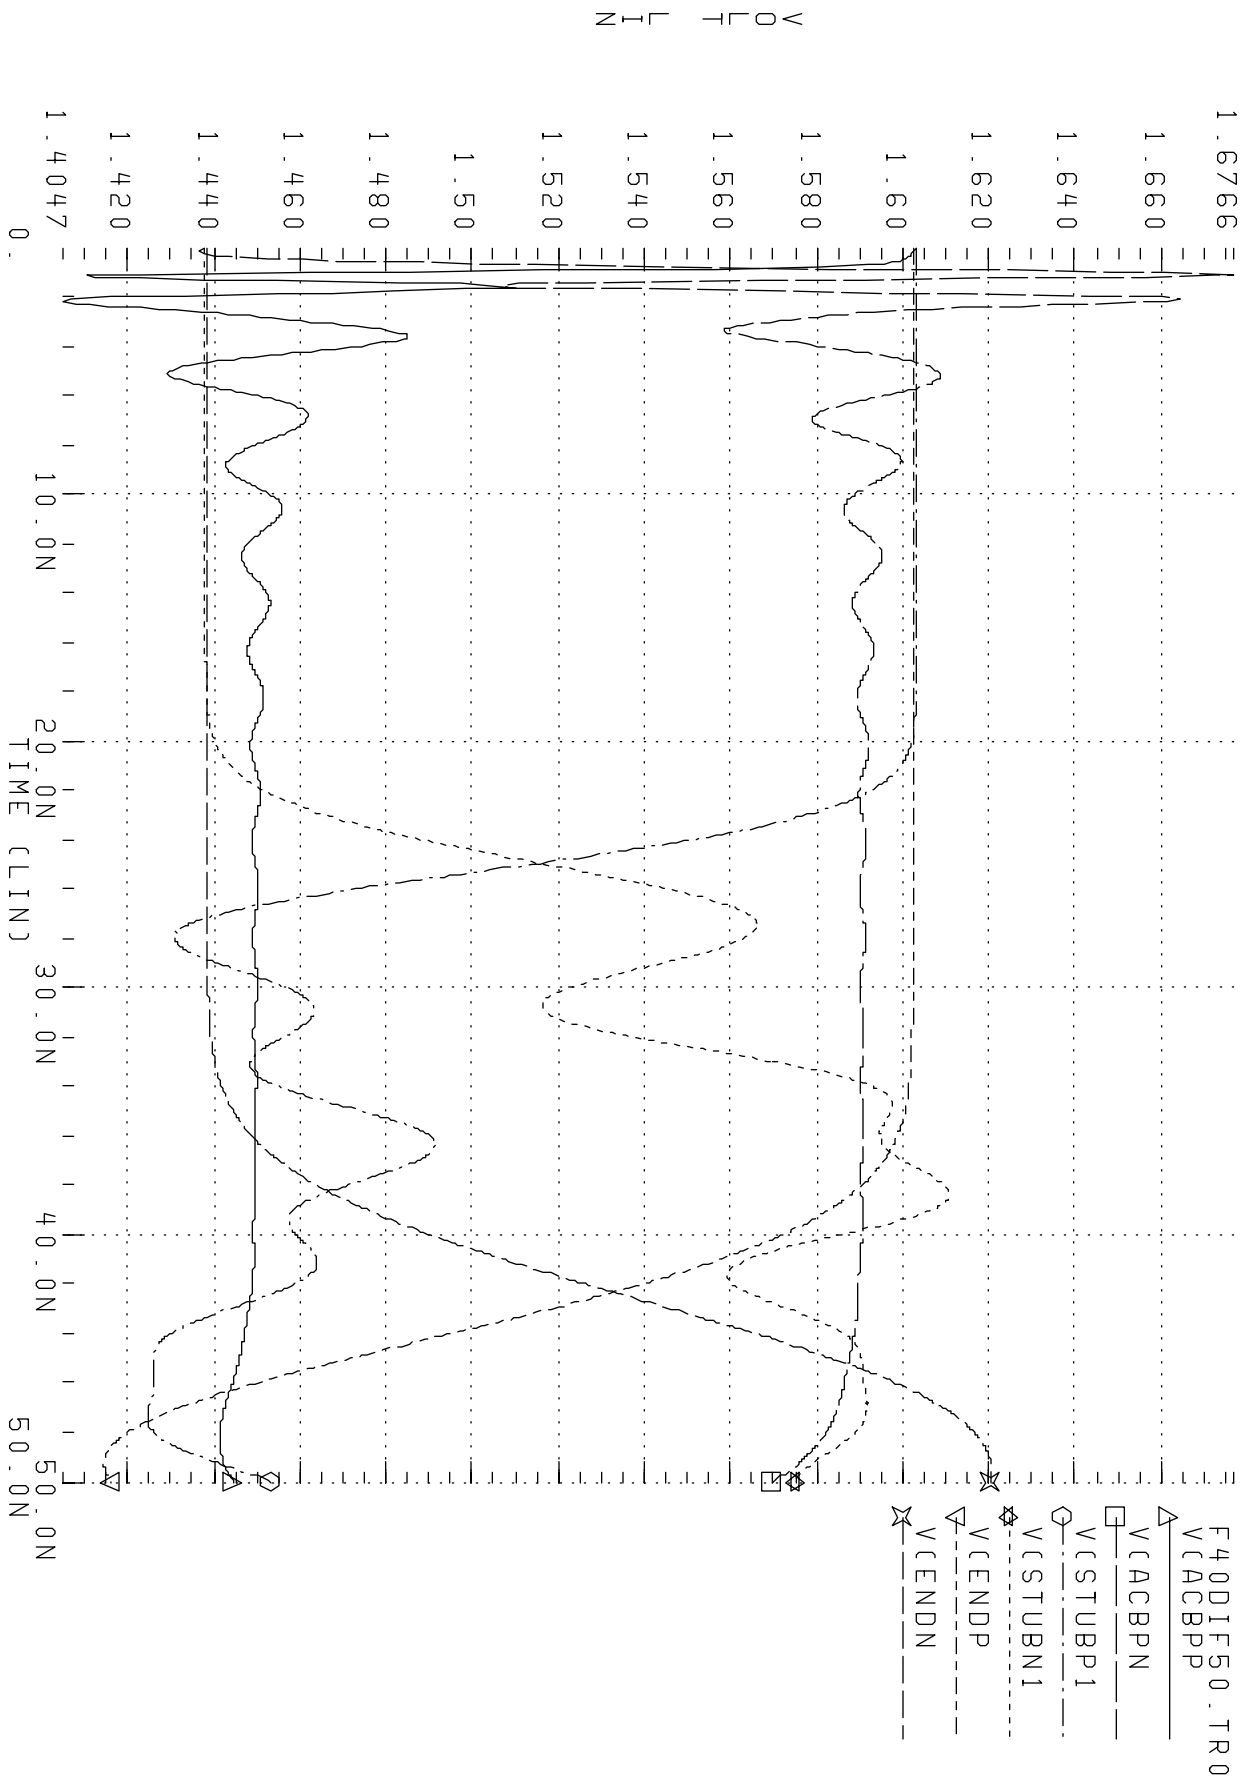

DIFF SCSI BUS WITH 16 LOADS FOLLOWING RULES

F40 SCSI CABLE NOISE SETUP 16 LOADS IN BOXES

F40 SCSI CABLE NOISE SETUP 500HM CABLES WITH 16 DRIVES

F40 SCSI CABLE NOISE SETUP 30CM BETWEEN DRIVES 16 LOADS
