X3T10/95-344 Rev 0

To: X3T9.2 Committee (SCSI)

From: George Penokie (IBM)

Subject: Change to SCSI-3 ASC

I am requesting a change to the description of ASC 5E 00 from:

LOW POWER condition Active to:

LOW POWER condition Enabled.

The reason for this change is because the word Active is easily confused with the active condition that is defined as one of the power conditions.
