Presentation to SCSI Streaming Commands Working Group

FC/Serial SCSI Error Concerns: Where Do We Stand?

- o Detection of missing sequences within an Exchange
  1. Use monotonically incrementing Seq\_Cnt within Exchange
    - presented by Ed Gardner, passed in WG but not plenary
  2. Target can re-request sequence?
  
- o Detection of missing or out-of-order Exchanges
  1. Use Cmd Ref. # for defining order
    - discussed at some meeting, but no proposal
  2. Recovery
    - Fail immediately or wait some period of time, or until next exchange is received?
  
- o General Recovery Model for SSC?
