Subject: Response to Public Review Comment #2 on X3.301-199x

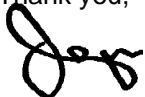

Dear Ron,

Thank you for taking time to comment on the SCSI-3 Primary Commands (SPC) during first public review. Your comment dealt with several missing identifier codes in the Peripheral mode page (09h). This issue was discussed during a working group meeting of X3T10 on November 5-6, 1996. X3T10 agreed to resolve this comment by making the Peripheral mode page obsolete in SPC.

SPC Revision 11 (available at <ftp://ftp.symbios.com/pub/standards/io/x3t10/drafts/spc/spc-r11.pdf> or in the SY-96-06 X3T10 mailing, which George Penokie receives) makes this change. Please review this document to verify that your comments were resolved satisfactorily.

Please be advised that you have 20 working days from the date of this message to indicate, in a written statement, acceptance or rejection of this response. Failure to respond will be deemed acceptance of the resolution.

Thank you,

John Lohmeyer, Chair X3T10 Technical Committee
