Re; Conversion of RBC standard to ISO/IEC document

John;

I would like to submit this quote to provide the editing efforts to convert the current REDUCED BLOKCK COMMAND set standard to comply with ISO/IEC standards. After consulting with various individuals, who have completed this task previously, I have concluded that it would require one man-month of effort. There would be little or no travel expenses incurred. Other expenses would include the generation of copies for review and normal document shipping costs.
The cost of this effort will be $10,000.00 for the man-month and will include domestic travel expenses and normal document copies and distribution. International travel will be billed to the Technical Committee.
The Technical Committee shall supply SPT with a sample ISO/IEC document.
The payment schedule is as follows;
At issuance of Purchase Order - $4,000.00 (not invoiced);
At completion of public review of the ISO/IEC standard - $6,000.00 (invoiced).

Thank you for the opportunity to provide this quote and I hope this meets your requirements,

Sincerely

Ron Roberts
