

# Fast-160 Agreements

T10/99-327r0

- ISI Precompensation required but vendor specific
- Skew post compensation required but vendor specific
- Skew compensation training pattern standard (exact pattern TBD)
- Transfer pacing via P1
- Originator's REQ(ACK) free running but respondent under offset rules
- Originator's REQ(ACK) aligned with data transitions

# Fast-160 Issues / Remaining tasks

---

- Format for specifying the timing budget
- Value of timing elements/tolerances from modeling/test data
- Determination of portion of timing elements subtracting from setup
- ISI pre compensation value
- Skew compensation value
- Required margin / allowed worse case error rate
- Algebraic worse case versus RMS worse case
