```
Document: T10/99-346r0
Date:     5 November 1999
Subject:  Mirror Site Report to T10
```

A complete mirror of the T10 web and ftp sites is now publically available:
```
        URL is http://www.t11.org/t10
        Hosted by DPT in Orlando, FL
```

Intent is that this is entirely complementary to t10.org:
```
        Copy of all files on each coast for 100% data availability
        Earthquake & hurricane tolerance :-)
        Hope to get the T11 files similarly hosted
```

This is NOT currently a real-time mirror:
```
        It is updated once per day (at about 6am Eastern Time)
        Uses an intelligent mirror scheme
      Does NOT require running the entire tree at t10.org
```

Based on Lotus Notes technology used on T11 web page.

Provides following additional features:
```
        All submissions by Change Date
        Doc Index by Author Last Name
        Draft Index by Project (all revisions)
        Searchable Listing (only searches database, not the documents themse
```
