

VENDOR IDENTIFICATION in the SCSI-2 INQUIRY Command

SCSI-2 defines a Vendor Identification field in the INQUIRY Data. This field is eight bytes in length, so there is a small probability that more than one vendor may elect to use the same Vendor ID. This document contains the current list of Vendor IDs selected by a number of vendors. This should help to avoid conflicts. This is not intended to be an exhaustive list of SCSI implementors nor does it guarantee that these firms will offer SCSI products.

Please contact John Lohmeyer, X3T9.2 Chairman, NCR Corporation, 3718 N. Rock Road, Wichita, KS 67226 to change IDs or to include a new ID. X3T9 is investigating a better mechanism for registering Vendor IDs, Medium Codes, etc.; however, until a better mechanism is identified, this will have to do.
