Naperville, IL 60566

Dear Sir:

Hewlett-Packard requests reservation of the next available Mode Select sequential-access density code with the following parameters.

- width: 3.81 mm (0.15 inches)
- tracks: one
- density: 2.4 Kbits/mm (61 Kbits/inch)
- coding: DAT
- type: cassette
- Note: (5) Helical scan

This format is a joint development of HP and Sony corporation for Digital Audio Tape (DAT) in computer applications. Please include this density code in the next revision of the SCSI-2 document.

Best Regards,

Elen Hunt
