Document: X3T9.2/87-145
Revision 1

From: Dave McIntyre
Hewlett Packard, Disc Memory Division

To: The X3T9.2 Committee,

Recently I brought a joint proposal for a new digital tape recording format (DAT) from HP and Sony. The committee requested at that time that a descriptive name be provided for that format.

Our proposed name is "DAT Data Storage" or "DDS". I hope that this name can be incorporated into the current revision of SCSI-2. Thank you for your attention.
