Re: Alleged Patent Infringement

Dear Mr. Lohmeyer:

AMP has been accused of patent infringement by Stewart Stamping Corp. in their Attorney's letter of March 16, 1988.

AMP has reviewed the patents sent to us by the attorneys for Stewart Stamping and has concluded that the patents do not cover the AMP connectors that are in the SCSI II document.

AMP can supply these connectors without requiring a license under the Stewart Stamping patents or under any other known patents.

Sincerely,

David L. Smith  
Patent Attorney
