Re: Stewart Connector Systems, Inc.
AMP Incorporated
Patent Infringement
Shielded Connectors
Our Ref: 87-517

Dear Sirs:

Reference is made to our letter of March 16, 1988 to which we have received no reply to date.

We have, however, been kept informed of the recent proceedings of the ANSI Committee X3T9.2 and we understand that AMP has taken the position that Stewart's patents do not cover the AMP shielded connectors that are in the SCSI II document. We also understand that AMP has recently modified the construction of the shielded connectors to which reference was made in our March 16th letter and is already tooled to provide the connectors.

Stewart Connector Systems believes that it is in the mutual interest of all concerned that this matter be clarified and resolved without further delay. To this end, we ask you to supply us with detailed drawings of the current versions of AMP's shielded connectors and samples (if available) so that the position set forth in our earlier letter can be reviewed, if necessary.

We look forward to your prompt response. Please contact the undersigned should you have any questions concerning this matter.

Very truly yours,

STEINBERG & RASKIN

Martin G. Raskin
