Dear Bill,

As per our conversation this morning, please find enclosed a "real copy" of ESDI Rev 2. This is the copy that was distributed by the ESDI Steering Committee back in October. There may be page number differences between your copy and the ESDI Steering Committee but not by much.

Minor editing changes were made to the Steering Committee copy as a result of distribution at X3T9.2 and later at X3T9 letter ballot. The copy you received would have been a special which included the X3T9 comments and been printed and copied solely for the X3 letter ballot based on a copy of the floppy I sent.

I have also enclosed a copy on an IBM floppy disk for you. It is in Wordstar format. To print it out you only need to do a MailMerge of ESDIPRT.

The Table of Contents in your copy should be a clue to finding out what is wrong. If a table number was skipped it is not in the TOC, and I would like to know what page the TOC shows the figures as appearing.

We'll get to the truth of this mystery somehow. Thanks for your detective work to date.

Yours sincerely,

I. Dal Allan
