October 20, 1988

Mr. John Lohmeyer
Chairman X3T9.2
C/O NCR Corporation
3718 N. Rock Road
Wichita, KS 67226

Dear John,

As you are aware, the Accredited Standards Committee IT8 has a task force developing a standard that will enable the exchange of digital data between color electronic prepress systems and direct digital color proofers. These are devices that prepare color pictures for high quality color printing.

Our task force has selected SCSI-1 as the basis for the exchange of this digital data. We thought it would be appropriate for you to make mention of this in the informative appendix to SCSI-2. Any parties interested in further information on the IT8 project can contact me at the above address.

Please advise if this is acceptable.

Sincerely,

William K. Smythe
Secretary, IT8
