Attn: John Lohmeyer Chairman X3T9.2 Committee

Dear John,

Please consider this a formal request for Stewart Connector, in conjunction with its partners Thomas and Betts and Viking, to present to the committee at the Dec. meeting test data on the performance of the two layer cable/connector as proposed for interior applications. It will also address rearward compatibility and other relevant considerations in the comparative testing of all the cables/connectors which have been proposed to fulfill the SCSI-2 daisy chaining needs.

We will look forward to seeing you in San Diego.

Best personal regards,

David A. Hatch
Manager of Advance Product
Development and Engineering
