**Cipher Data Products, Inc.**

**subject: Interpretation of Mode Parameters  
Medium Partition Page (1)**

**date: July 6, 1990**

**from: Bharat Shah**

To: John Lohmeyer, Chairman X3T9.2

This memo is in response to document X3T9.2/90-98 and X3T9.2/90-87.

The Medium Partition Page (1) Section 9.3.3.2, clearly defines the Partition Size Descriptor(s):

"Partition size descriptors define the size of the respective partitions in the units specified in the PSUM field."

This means that if the device has N partitions, there will be N Partition Size Descriptors defining partition size of default partition and additional partitions defined.
