Mr. John Lohmeyer
NCR Corporation
3718 N. Rock Road
Wichita, KS 67226

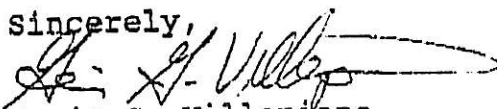

Dear Mr. Lohmeyer:

I would like to have the Scanner Working Group consider the following items for inclusion on the discussion agenda for the meeting of 24 April 1991:

1. Provision for identifying how data from a color scanning device is formatted, i. e., R-byte/G-byte/B-byte vs. R-line/G-line/B-line vs. R-plane/G-plane/B-plane.
2. Bit packing for color scanners.
3. Provision in the Set Window Command for standard field definitions for:
 - Zooming
 - Edge emphasis
 - Gamma
 - Lamp color specification
 - Brightness by color plane
4. Capability to poll devices to determine features and ranges supported, e. g.:
 - Min/max resolution
 - Min/max bed size
 - Mono/color
 - Gamma functions available
5. Inclusion of JPEG, RLE for compression.

Please distribute this with your mailing. Thank you for your time and consideration.

Sincerely,

Gavin G. Villapiano
Director, Software Resource and Integration Division
