SUBJ.: FFS Press Release

In order to entice interest from software and systems people in the Flat File System effort, I would like to be able to issue a press release describing the effort and the companies interested in working on the topic. While I have yet to draft the release, it would save pretty much what the SD3 proposal said about the FFS effort. I would appreciate it if companies interested in being mentioned in the press release contact me. If there is enough interest, then I will prepare a press release for everyone's consideration. Quantum can take care of the logistics of issuing the press release.
