Subject: SCSI-3 Primary Commands -- Approved Additions List

This document lists each SCSI-3 Primary Commands (SPC) section that is changed by one or more approved X3T9.2 documents. Proposed changes are also listed and identified by an "Rx" in their revision numbers.

This list is my working recipe for converting SCSI-2 Chapter 8 into the SPC. In addition, I have prepared an outline of the SPC section headers. The outline can be found in document 92-225Rx.

I have included the Change Inquiry mode page as a proposed change here. I have a vague recollection of proposal 92-085Rx being withdrawn. But, I cannot find proof of this in the October Plenary minutes.

Please review the SPC outline and this document. Compare what you find here to your expectations of the SPC. Please inform me of any discrepancies.

I expect discussion of this list to be on the agenda for the January, 1993 X3T9.2 Working Group meeting.

Section Status	Section Title Applicable Approved Documents
1.1 add new sect	Removable Medium Device with an Attached Medium Changer 92-006R1
2.3.3 update update	COPY function codes 00h, 01h, 05h, and 06h 90-048R7 90-183R0
2.3.4 update update	COPY function codes 02h and 07h 90-048R7 90-183R0
