Subject: Comments on SSA-S3P rev 4

### **BACKGROUND**

The following comments are based on SSA-S3P rev 4 which was letter balloted to X3T10. The comments are broken up into editorial/style and technical comments.

### **EDITORIAL/STYLE COMMENTS**

- 1) Change Header from "X3T10.1 / 1051D revision 3" to "X3T10.1 / 1051D revision 4"
- 2) 1.1.1: Change "(project X3T10.1/1121)" to "(X3.294:1996)".
- 3) 1.1.2: Change "(project X3T10.1/0989)" to "(X3.295:1996)".
- 4) 1.1.3: Change "(project X3T10.1/1145)" to "(X3.293:1996)".
- 5) 1.1.4: Change "(project X3T10.1/1051)" to "(project X3T10.1/1051, this standard)".

### **TECHNICAL COMMENTS**

- 1) 4: Add "In case of conflict, figures take precedence over tables and both figures and tables take precedence over text."
- 2) 8.5, five places: Change "I\_T nexus" to "I\_T nexus or I\_T\_L nexus". 8.5 uses the term I\_T nexus in 5 places when referencing by 6.11 (ABORT TASK SMS), 6.12 (ABORT TASK SET SMS), 6.13 (CLEAR TASK SET SMS), and 6.15 (LOGICAL UNIT RESET SMS) which refers to an I\_T\_L nexus. However it is also referenced to by 6.14 (TARGET RESET SMS) for an I\_T nexus.
- 3) 8.5, bullet c): Add "LOGICAL UNIT RESET" to the list.
- 4) C.1.6, bullet b): the reference to the OOT bit in "7.4", should be "6.6" (SCSI COMMAND SMS).
- 5) D.1.2, third paragraph: the reference to "7.2" should be "6.2" (SMS validation). The reference is not automated, and should be.

Sincerely,

John Scheible
