A map and other local information are available at the [reservations link](#).

---

<sup>†</sup> Sometimes the date-selection calendar for reservations appears to lock the user into dates in the current month and/or the next month. The escape from this is to find the > on the right-hand side of the second month's header line and click on it. This seems to afflict elite Marriott rewards members more than others. A more tedious solution is to start at the main [Marriott website](#) and work to the hotel and dates from there.
