Results of Meeting

1. Opening Remarks

John Lohmeyer, the T10 Chair, called the meeting to order at 9:00 a.m., Thursday March 9, 2000. He thanked Paul Aloisi of Texas Instruments for hosting the meeting.

John said that NCITS Subgroup Membership forms and the T10 Mailing Subscription form were available from the head table. He said that people should use the NCITS forms to insure the NCITS Secretariat has the latest membership information. These forms should be mailed directly to the NCITS Secretariat.

As is customary, the people attending introduced themselves and a copy of the attendance list was circulated. Copies of the draft agenda and general information on T10 were made available to those attending.

2. Approval of Agenda

The draft agenda was approved with the following additions/changes:

- 8.16 SCSI Signal Modeling (SSM) {Project 1414-DT} [Aloisi]
- 10.1.1 Proposal for LVD Bus Length (00-170r1) [Evans]

The following agenda items were added/revised during the course of the meeting:

- 10.1.6 Task Set Full Clarification (99-343) [Snively]
- 10.5 Call for Volunteers to Chair T10
- 10.6 T10 Style Guide and Templates

3. Attendance and Membership

The membership requirements were reviewed. NCITS rules permit one vote per organization. An individual from a new organization must attend two out of three consecutive plenary meetings. He/she may apply for voting membership the second meeting via a letter to the Chair of T10. The individual may apply for membership and begin voting at anytime following adjournment of the first meeting. Typically, the individual applies for membership and starts casting votes at the second plenary meeting. Working group and other ad hoc meetings do not count toward attendance requirements.

The option that allows a person attending their first meeting to become a voting member immediately following that meeting, provided their NCITS fees have been paid, permits a new member to vote on letter ballots issued between his/her first and second meetings. Unfortunately, this option also means that the new organization is immediately in attendance jeopardy.

To maintain membership, organizations must pay the NCITS Service Fee (\$300). The ANSI International Program Fee (also \$300) is billed at the same time.

John briefly discussed the mailing fees. Complete pricing information is contained in the 2000 membership form (available at ftp://ftp.t10.org/t10/mem_form.txt).

There are also minimum attendance requirements to maintain voting membership on T10. If a member organization fails to attend two of the last three T10 meetings, they are warned that failing to attend the next T10 meeting would result in their membership being terminated.

At the January 2000 meeting, Iomega and UNISYS had been in attendance jeopardy. Consideration of a motion to continue their membership in spite of their failure to attend was deferred to this meeting. The action of deferring consideration of the motion meant that their memberships were terminated at the January meeting. The Chair contacted NCITS regarding whether the deferred motion was rendered moot by this action or whether these memberships would be re-activated at the March meeting should the motion now pass. The NCITS Secretariat

subsequently ruled that because of the undue financial hardship involved in attending a meeting outside the U.S., the deferred motion is in order. Should these organizations be present at the March meeting and should the deferred motion pass, then they are to be treated as if their memberships were not terminated in Australia.

John verified that both Iomega and UNISYS are present at this meeting. John stated that the motion from January was now on the floor. Gene Milligan moved to amend the motion to read (in total) "Moved that in view of the special circumstances T10 requests its Chair to suspend the membership of the T10 members in jeopardy and not present at the January meeting and to defer the rollcall of members in jeopardy and not present at the January meeting until the March meeting." Ed Gardner seconded the motion to amend. The motion to amend passed on a vote of 22:2:1:14=39. The amended motion pass on a vote of 25:4:3:7=39.

The Chair said he had sent letters to 20 people from 11 organizations informing them that their membership was in jeopardy due to non-attendance (see 00-003r0) and that their membership would be terminated if they did not attend this meeting. Iomega and UNISYS were added to the list of organizations in jeopardy as a result of the motion just passed. The following organizations were in attendance jeopardy:

Amphenol Interconnect
BREA Technologies, Inc.
CMD Technology
Dell Computer
General Dynamics
Hewlett Packard Co.
Hitachi Cable Manchester, Inc.
Hitachi Storage Products
Honda Connectors
Iomega
Linfinity Micro
Toshiba America Elec. Comp.
UNISYS

All of these organizations were present except:

Hitachi Storage Products

The organizations in attendance jeopardy were terminated due to lack of attendance (i.e., the principal member was changed to observer status and the first alternate member, if any, was dropped; additional alternates, if any, were changed to observers).

No organizations requested new (or reinstated) membership.

The T10 membership during the meeting was 40 organizations up from 39 organizations following the last meeting. Enclosure (1) is the list of the people present at the meeting and enclosure (2) is the current T10 membership list.

4. Approval of Minutes - January '00 Meeting - Surfers Paradise, Australia (T10/00-122r1)

The minutes were approved as written.

5. Document Distribution

Members who have any problems with their mailing subscription should deal directly with Monica Vago (mvago@itic.org) (202) 626-5741.

John Lohmeyer requested that all documents for the next mailing be in his hands in electronic format by 10:30 a.m. on Thursday March 16, 2000. Documents received after this time may go into a subsequent mailing.

John reminded the committee of the requirements for document submission. Since T10 meets its document retention requirements by preparing mailings, documents included in the mailing must be suitable for archiving. This means that native-format and/or Portable Document Format (PDF) electronic originals with proper identification must be submitted.

The electronic copies can be sent directly to John by email (at lohmeyer@t10.org), or they can be transferred by ftp protocol to ftp.t10.org and placed in the /incoming directory. In the latter case, please also send email to John informing him of the file name and location of the file.

Minutes are available on the T10 World Wide Web page (see below), and are distributed to the T10 Reflector.

To be added to the T10 Reflector, send an email to majordomo@t10.org with the line 'subscribe t10' in the message body.

The NCITS Secretariat maintains a World Wide Web page at <http://www.ncits.org/>. LSI Logic maintains a World Wide Web page on behalf of T10 on a server provided by the SCSI Trade Association at:

<http://www.t10.org/>

The current document register is enclosure (3). The T10 document register is also available at:

<ftp://ftp.t10.org/t10/dr.txt>

6. Call for Patents

This is a regular agenda item to identify any potential patent issues with developing standards and technical reports.

A document is available from ANSI, "Procedures for the Development and Coordination of American National Standards", at no charge. This document is also on the WWW at http://www.ncits.org/help/ansi_sdo.html. Section 1.2.11 contains the ANSI patent policy. Amy Marasco manages patent issues for ANSI and can be contacted at amarasco@ansi.org or 212-642-4954.

A call for patents was made. There were no responses.

8. Project Status Reports

8.1 Project Status Summary and NCITS Liaison [Lohmeyer]

John Lohmeyer said that the current T10 project status summary was included in the T10 Information Packages distributed prior to the meeting and will be included in the mailing as usual. John announced that ANSI had withdrawn SCC, SPI, SPI Amendment #1, SIP, and Fast-20 on January 19, 2000 as T10 had requested.

8.2 SCSI Common Access Method - 3 (CAM-3) Status {Project 990-D} [Dallas]

John Lohmeyer reported that Bill Dallas has been assigned to another project and no longer can work on CAM-3. He noted that no one has responded a request for an editor for CAM-3. Additional action was taken on CAM-3 under item 10.3.

8.3 SCSI-3 Stream Commands (SSC) Status {Project 997-D} [Peterson]

John Lohmeyer reported that the public review for SSC closes on March 26. Additional action on SSC topics was taken under item 10.2.

8.4 SCSI Fibre Channel Protocol - 2 (FCP-2) {Project 1144-D} [Snively]

Bob Snively noted that meetings earlier in the week resolved about a quarter of the technical comments (minutes in 00-182 and 00-156). The total comments received were about 1,300. A meeting Wednesday afternoon 5 April (the next T11 week) will continue reviewing the comments. Further comments review will occur at meetings held on Monday 15 May meeting in the next T10 meeting week. Bob was unwilling to predict when the comments resolution process will be completed.

8.5 SCSI Architecture Model - 2 (SAM-2) {Project 1157-D} [Weber]

Ralph Weber reported that SAM-2 revision 12 remains the current revision. The working group is discussing the model for devices with multiple ports and agreement on a change proposal is possible at the May meetings (minutes in 00-156). Also, the proposal to add a COMMAND CLEARED status will be written as a formal change proposal for review at the May meetings.

8.6 Multimedia Command Set - 2 (MMC-2) Status {Project 1228-D} [McFerrin]

John Lohmeyer reported that the NCITS letter ballot on MMC-2 resulted in two negative votes. The votes arose from a reference to "DVD+RW" that was described as an "obsolete reference" that Hitachi suggested should be changed to "+RW". John Lohmeyer reported on the following recommendation from the MMC Working Group:

By a vote of 5:1:0 the MMC working group recommends that T10 respectfully decline to make any changes in the DVD+RW references in BSR NCITS.333-200x (MMC-2). The nomenclature for disks of the format known as +RW must contain the prefix, "DVD" in order to avoid confusion about the purpose of the format within this standard.

Han Zou explained that the DVD+RW reference is obsolete and expressed concern that the MMC Working Group recommendation fails to address the obsolete nature of the reference. He further noted that the description in the current MMC-2 is for a 3.0 GB DVD+RW, which has become an obsolete concept.

Gary Robinson noted that changing the document both delays processing the standard and perhaps substantially so because the references are not fully established. He further suggested that the ISO processing of MMC-2 would be a more appropriate forum for resolving the references issues.

Bill McFerrin moved that T10 accept the MMC working group recommendation that the nomenclature for discs of the format known as +RW must contain the prefix, "DVD", in order to avoid confusion about the purpose of the format within this standard and that T10 recommend that BSR NCITS.333-200x (MMC-2) not be changed as suggested by the NCITS negatives. Mark Evans seconded the motion.

The group discussed the relationship between ANSI standards and other non-accredited standards.

On a roll call vote, the motion passed on a vote of 23:2:6:9=40. The details of the vote are as follows:

IV - Individual Vote

John Lohmeyer, George Penokie, Gene Milligan, and Zane Daggett stated that they cast votes of abstain based on the fact that they were not materially affected by the outcome of the vote. Bill Dawkins and Tomas Kulesza stated that they cast votes of abstain based on lack of expertise regarding the subject.

Han Zou stated that his no vote was because the motion itself was against its claimed motivation since using DVD+RW instead of +RW was to create confusion not to avoid confusion. As well known, the standard referred by the MMC-2 was ISO/IEC 16969 (equivalent to ECMA-274), that specifies the media +RW, not DVD+RW.

John Lohmeyer took an action item to communicate to NCITS the T10 recommendation that BSR NCITS.333-200x not be changed.

8.7 SCSI Primary Commands - 2 (SPC-2) Status {Project 1236-D} [Weber]

Ralph Weber reported that SPC-2 revision 16 containing the changes approved by this meeting will be ready for the next mailing. He announced that he would be requesting a forwarding letter ballot following the May meetings and that he would lobby for placing major proposals such as Access Controls in SPC-3 at the May meetings.

8.8 Reduced Block Commands (RBC) {Project 1240-D} [McLean]

Pete McLean reported that RBC has passed public review with no comments and is ready to go to NCITS letter ballot and NCITS approval is expected in April.

8.9 SCSI Parallel Interface - 3 (SPI-3) {Project 1302-D} [Penokie]

George Penokie reported that SPI-3 revision 13b was prepared to resolve concerns expressed by NCITS.

Gene Milligan moved that T10 approve the changes in SPI-3 revision 13b as not substantive. Neil Wanamaker seconded the motion. Larry Lamers requested that consideration of the motion be deferred based on SPI-3 revision 13b not being available two weeks prior to the meeting.

Dal Allan expressed concerns about the SPI-3 revision 13b changes moving the document away from the ISO style guide. Dal Allan moved that the T10 chair be instructed to initiate an investigation concerning why T10 was requested to prepare SPI-3 in a format that appears to conflict with the ISO/IEC JTC1 Style Guide (e.g., removal of the document title at the foot of each page) and report to the next meeting. Gene Milligan seconded the motion. The motion passed 23:0:2:15=40.

John Lohmeyer took an action item to initiate an investigation concerning why T10 was requested to prepare SPI-3 in a format that appears to conflict with the ISO/IEC JTC1 Style Guide (e.g., removal of the document title at the foot of each page) and report to the next meeting.

Larry Lamers asked that the T10 web site pointer be changed to point to SPI-3 revision 13a until 13b receives T10 approval. John said that the change would take effect the next time he updates the web site.

8.10 MultiMedia Command Set - 3 (MMC-3) {Project 1363-D} [McFerrin]

Bill McFerrin reported that Ron Roberts brought in a new revision of MMC-3 that was reviewed in the working group meeting (minutes in 00-177). Bill announced the possibility of holding an MMC-3 review meeting outside the T10 meeting week, and asked that one such meeting be authorized between April 15 and the May meeting week.

8.11 Reduced MultiMedia Command Set (RMC) {Project 1364-D} [McFerrin]

Bill McFerrin reported that the RMC draft has not been revised since the last meeting. He stated that the project leader has been asked to determine whether continued work is necessary on RMC.

8.12 SCSI Parallel Interface - 4 (SPI-4) {Project 1365-D} [Penokie]

George Penokie reported on the activities of the SPI-4 Working Group meetings (minutes in 00-134 and 00-155). He stated that the first revision of SPI-4 is planned in the middle of May. He stated that the performance goals of SPI-4 appear achievable but details of the driver/receiver technology are still being negotiated.

George announced that the next meeting of the SPI-4 Working Group meeting will be on March 27 and 28 in Milpitas, CA. He asked that everyone be aware that both physical and protocol topics will be discussed at the meeting and stated that protocol topics (e.g., margin control and flow control) will be discussed in the afternoon of the second day. George announced that another SPI-4 Working Group meeting will be on April 26 and 27 in Colorado Springs, CO.

8.13 SCSI Domain Validation Technical Report (SDV) {Project 1378-DT} [Lamers]

Larry Lamers reported that the first revision of the draft technical report is on the T10 web site and requested time in future working group meetings to review it.

8.14 SCSI on Scheduled Transfer (SST) {Project 1380-D} [Woelz]

John Lohmeyer reported that Don Woelz requested authorization for an SST working group meetings held on the Wednesday of the T11 meeting weeks in April and June.

8.15 SCSI Medium Changer Commands - 2 (SMC-2) {Project 1383-D} [Oetting]

Erich Oetting reported that a first revision SMC-2 should be available for the mailing. He agreed to incorporate the SMC-2 material from Annex B of SPC-2 and noted that other SMC corrections will appear in the first SMC-2 revision.

8.16 SCSI Signal Modeling (SSM) {Project 1414-DT} [Aloisi]

Paul Aloisi reported on the activities of the Signal Modeling Working Group (minutes in 00-146r1 and 00-163r0). He noted that the T10 web site will be used to coordinate the activities of the working group.

Dean Wallace was given an action item to lead the SSM working group in preparation of a press release regarding the usage of the T10 web site that John Lohmeyer can forward to NCITS for distribution. John Lohmeyer took an item to forward the SSM press release to NCITS.

At the request of Bill Ham, Zane Daggett was given an action item to prepare a project proposal for the SCSI Passive Interconnect Performance technical report.

8.17 SCSI VI Protocol (SVP) {Project 1415-D} [Gardner]

Ed Gardner reported on the activities of the CAP working group regarding document 00-172r0 (minutes in 00-156). He stated that a first revision of SVP will be available more than two weeks before the next meeting.

8.18 SCSI Primary Commands - 3 (SPC-3) {Project 1416-D} [Weber]

Ralph Weber reported that a first draft of SPC-3 will be available as soon as changes are approved for inclusion in it, which might be as early as following the May meeting.

8.19 SCSI Block Commands - 2 (SBC-2) {Project 1417-D} [Milligan]

Gene Milligan reviewed the proposals known to be approved for SBC-2 and the schedule for SBC-2 (00-187r0) and the activities of the CAP working group (minutes in 00-156). There were no objections to the schedule for SBC-2 proposed in 00-187, which included new proposal cut off in November 2000, stabilization in March 2001, and letter ballot in May 2001.

9. Old Business

9.1 Report on T10 Procedures Study Group Meeting [Lohmeyer]

John reported that the T10 procedures study group did not hold a meeting this week. He then briefly described the activities of the January study group (see description in January plenary minutes, 00-122).

9.2 Project proposal for object-based storage devices command set (OSD) (99-312r0) [Milligan]

Consideration of the following motion was deferred from the January '00 meeting:

“that the OSD project proposal be forwarded to NCITS for processing.”

The motion passed on a vote of 23:1:1:15=40. Bob Snively stated that his no vote based on the belief that project is a solution is search of a problem. Bill Dawkins stated that his abstention was based on lack of expertise regarding the subject.

John Lohmeyer took an action item to forward the OSD project proposal to NCITS within 72 hours. Ralph Weber took an action item to add OSD to the device types and version descriptors in SPC-2.

Gene Milligan reported that the next revision of the draft OSD standard will be available before the May meeting.

9.3 Editing RBC for ISO/IEC (99-284r0) [Roberts]

John Lohmeyer reported that during the January '00 meeting he had incorrectly reported the amount of the bid from Don Tolmie on editing RBC for ISO/IEC. The Tolmie bid is now \$3,500. The committee expressed no interest in the development of an ISO/IEC version of RBC.

John Lohmeyer took an action item to send letters to Ron Roberts and Don Tolmie thanking them for bidding on the conversion RBC to ISO/IEC and informing them that T10 has decided not to pursue the project.

10. New Business

10.1 Actions on Working Group Recommendations

10.1.1 Proposal for LVD Bus Length (00-170r1) [Evans]

Mark Evans moved that 00-170r1 (Proposal for LVD Bus Length) be accepted for inclusion in SPI-4. Gene Milligan seconded the motion. The motion passed on a vote of 21:0:2:17=40.

Gene Milligan stated that his no vote was because the T10 recommendation was inconsistent its action on MMC at ANSI, where there is no recommendation to withdraw. Han Zou stated that his abstention was based on lack of knowledge regarding the consequences of the vote. Bill Dawkins stated that his abstention was based on lack of expertise regarding the subject.

Gene Milligan took an action item to notify the JTC 1 TAG of the T10 recommendation to withdraw MMC from ISO/IEC processing.

11.2.4 Potential Approval of SBP-2 [Milligan]

John Lohmeyer agreed to maintain this item on the May agenda for the purpose of conducting a roll call vote on ISO/IEC fast track processing of SBP-2.

11.2.5 Approval of Working Group 4 Delegation [Milligan]

Gene Milligan asked if any T10 members wished to be considered for the WG 4 Delegation. He then stated that the delegation would be Kumar Malavalli and Gene Milligan. In the absence of any objections, the committee unanimously approved the delegation.

12.2 T13 Liaison Report [Milligan]

Gene Milligan reported on the February meeting of T13 in Placerville, CA. He noted that the ATA/ATAPI video work and the proposed definition of partition tables may have accounted for a larger than usual attendance. ATA/ATAPI-5 comments resolution was completed. Review of version 3 of the enhanced BIOS specification was completed and a letter ballot will be held soon. A special working group meeting on video will be held on March 21 and 22 in Redmond and the April T13 meeting will be held in Boulder, CO on April 18 through 21. More information is available at www.t13.org.

12.3 SFF Industry Group [Allan]

Dal Allan provided the following electronic report:

The issue over patents with HSSDC has been resolved by replacing the figures in the specification which do not identify the patented feature. A letter stating that nothing in the patent is required to implement HSSDC will be provided by FCI.

Effort has begun on the backplane project to analyze 100-pin SCA-2 to determine whether it can meet the characteristics required of dual port 12 Gbs performance. The initial results are optimistic.

The drawing provided for current generation 5 1/4" CD ROMs which was used to update SFF-8551 will be redrawn with superfluous features removed and some dimensions identified as max instead of with tolerances.

Rev 4.0 of INF-8090 for ATAPI DVD has been completed and is ready for distribution in the next mailing.

The optical testing SSWG is proceeding well with identification of a large variety of factors which affect the testing process and fixtures as well as the components under test.

12.4 IEEE 1394 [Johansson]

Sep 10-14, 2001	Huntington Beach, CA	QLogic
Nov 5-9, 2001	Monterey, CA	Adaptec

Larry Lamers moved that T10 reinstate the January 2001 meeting to be held in Orlando, FL hosted by Adaptec/DPT. Zane Daggett seconded the motion. The arguments for the January meeting week centered around the frequent scheduling of ad hoc meetings in January anyway. The arguments against the January meeting week centered around the lack of productive work at such meetings. The motion passed on a vote of 14:3:2:21=40.

14.1 Authorization of Working Group Meetings

John noted that the working group meetings are required to operate under the same voting procedures as does T10 (that is, one vote per organization) and the results of a working group are not binding on the parent committee. Ad hoc groups should strive to achieve consensus prior to bringing issues to T10.

Erich Oetting moved that T10 authorize the T10-related meetings and events in the list above that had not previously been approved. Paul Aloisi seconded the motion. The motion passed seconded.

15. Adjournment

The meeting was adjourned at 2:20 p.m. on Thursday March 9, 2000.
