Results of Meeting

1. Opening Remarks

John Lohmeyer, the T10 Chair, called the meeting to order at 9:00 a.m., Thursday September 12, 2002. He thanked Dave Peterson of Cisco Systems for hosting the meeting.

John said that INCITS Subgroup Membership forms and the T10 Mailing Subscription form were available from the head table. He said that people should use the INCITS forms to insure the INCITS Secretariat has the latest membership information. These forms should be mailed directly to the INCITS Secretariat.

As is customary, the people attending introduced themselves and a copy of the attendance list was circulated. Copies of the draft agenda and general information on T10 were made available to those attending.

2. Approval of Agenda

The draft agenda was approved with no additions/changes.

The following agenda items were added/revised during the course of the meeting:

   12.7 SNIA [Cummings]
3. Attendance and Membership

The membership requirements were reviewed. INCITS rules permit one vote per organization. An individual from a new organization must attend at least one T10 plenary meeting as an Advisory Member. He/she may apply for voting membership at this meeting, which becomes effective following adjournment of the meeting. Voting privileges begin upon receipt by the INCITS Secretariat of applicable fees for the membership year.

To maintain membership, organizations must pay the INCITS Service Fee ($800).

There are also minimum attendance requirements to maintain voting membership on T10. If a member organization fails to attend two of the last three T10 meetings, they are warned that failing to attend the next T10 meeting would result in their membership being terminated.

The Chair said he had sent letters to 7 people from 5 organizations informing them that their membership was in jeopardy due to non-attendance (see 02-295r0) and that their membership would be terminated if they did not attend this meeting. The following organizations were in attendance jeopardy:

- Andiamo Systems, Inc.
- Conexant/Mindspeed
- KnowledgeTek, Inc.
- Silicon Image
- Western Digital Corporation

John noted that George Eisler had requested that the Conexant/Mindspeed membership be dropped.

All other organizations in attendance jeopardy were present except:

- Silicon Image

The members from the organizations that failed to attend will have their membership changed to non-voting status.

No organizations joined the committee at this meeting.

The T10 membership during the meeting was 46 organizations down from 48 following the last meeting. Enclosure (1) is the list of the people present at the meeting and enclosure (2) is the current T10 membership list.

The following organizations requested membership in T10 to take effect after the meeting:

none

John Lohmeyer reminded members that failure to vote on two out of the last three letter ballots also would result in membership jeopardy and then reported on the status of companies that have not voted on recent letter ballots. No organizations are currently in letter ballot jeopardy. However, the following organizations will be in letter ballot jeopardy if they fail to return the next letter ballot: Honda Connectors, Iomega Corp., and Molex Inc.
4. Approval of Minutes - July 2002 Meeting - Colorado Springs, CO (T10/02-273r1)

The minutes were approved as written.

5. Document Distribution

Members who have any problems with their mailing subscription should deal directly with Parthenia Purnell (ppurnell@itic.org) (202) 626-5741.

John Lohmeyer requested that all documents for the next mailing be in his hands in electronic format by 10:30 a.m. on Thursday September 19, 2002. Documents received after this time may go into a subsequent mailing.

John reminded the committee of the requirements for document submission. Since T10 meets its document retention requirements by preparing mailings, documents included in the mailing must be suitable for archiving. This means that native-format and/or Portable Document Format (PDF) electronic originals with proper identification must be submitted.

People can obtain T10 document numbers and revised T10 document numbers by filling out a web form at http://www.t10.org/members/. The assigned T10 document number will be sent to the requestor by e-mail. The requestor may then reply to this email, including the document to be posted as an attachment. The document will be automatically posted on the T10 web site.

T10 members can complete this entire process using their personal T10 password. John explained that members who do not know their password should surf to the above URL and click on the “forgot password” link to have their password sent to them via e-mail.

John noted that non-members can also use the above document number process, but their requests will require approval by an administrator.

Minutes are available on the T10 World Wide Web page (see below), and are distributed to the T10 Reflector.

To be added to the T10 Reflector, send an e-mail to majordomo@t10.org with the line ‘subscribe t10’ in the message body.

6. Call for Patents

This is a regular agenda item to identify any potential patent issues with developing standards and technical reports.

John Lohmeyer presented a foil containing a summary of the ANSI patent policy prepared by Gary Robinson. The summary is also included on the Rules and Procedures (plus Patent Information) page on the T10 web site.

Cris Simpson reminded the committee that a statement of the Intel patent policy can be found in T10/01-041r0.

John asked that anyone who knows of other applicable patents to contact him.

There were no responses to the call for patents other than described above and in 6.1.

6.1 HP Patent Position re Automation Drive Interface standards (02-313) [Wilkinson]

John said that he had received 02-313r0, HP Patent Position re Automation Drive Interface standards, from Michael Banther.

7. Review of Old Action Items

479 John Lohmeyer will forward SRP revision 16a to INCITS for processing towards first public review. Complete

480 Gary Robinson will report to JTC 1 that T10 has reviewed the new work item proposal, and recommends that the US National Member vote to approve the new work item proposal JTC 1 N 6676, High Performance Serial Bus (IEEE Std. 1394-1995 and 1394a-2000), project 1.25.13.15.01 and that all six questions be answered yes and that Peter Johansson be named as the editor. Complete

481 Gary Robinson will prepare a NWIP for IEEE 1212, Standard for Control and Status Register (CSR) Architecture for Microcomputer Busses. Complete

8. Project Status Reports

8.1 Project Status Summary and INCITS Liaison [Lohmeyer]

John Lohmeyer said that the current T10 project status summary was included in the T10 Information Packages distributed prior to the meeting and will be included in the mailing as usual.

There is a link to the INCITS antitrust guidelines on the T10 web site at http://www.t10.org/t10_info.htm.

John reported that INCITS is still considering the 'obsolete' standards category requested by T10. He noted that 'withdrawn' standards are available upon request from the INCITS secretariat but that they are not listed on the INCITS web site. John also noted that the INCITS web site contains no recommendation that the INCITS secretariat be contacted if a standard cannot be found.
The committee discussed the status of the effort to make ‘withdrawn’ standards available and the nature of a recommendation on the issue that could be made to INCITS.

Gerry Houlder moved that the chair be instructed to ask INCITS to post a list of withdrawn standards on the INCITS web site including information on how to obtain them. Mark Evans seconded the motion. In the absence of any objections, the motion passed unanimously.

John Lohmeyer took an action item to ask INCITS to post a list of withdrawn standards on the INCITS web site including information on how to obtain them.

8.2 SCSI Fibre Channel Protocol - 2 (FCP-2) {Project 1144-D} [Peterson]

John Lohmeyer reported that Dave Peterson has been appointed editor for FCP-2. Dave Peterson reported that a new revision of FCP-2 incorporating agreed changes will be available at least two weeks prior to the next meeting.

The new revision will address at least the negative votes from INCITS. Dave explained that the FCP-2 group considered other critical changes in FCP-2 as well.

John Lohmeyer reported that INCITS negative votes were received from IBM, HP, Panasonic, and ICCP. Oracle abstained. John noted that the Panasonic and ICCP votes referenced the IBM and HP comments, but did not contain additional comments.

Dave explained that the agreement is to incorporate the changes requested by HP and that doing so would also address the IBM comments.

John asked the group to consider whether a T10 letter ballot should be conducted instead of doing a meeting vote. Ed Gardner requested that the document be posted at least three weeks prior to the November meeting if a meeting vote is to be taken instead of a letter ballot.

Dave Peterson suggested that a letter ballot might be a better idea because of the amount of change in the error recovery sections. The committee discussed the mechanics of holding a letter ballot on FCP-2. Dave agreed to consider carefully whether or not a letter ballot would be needed and to keep John informed regarding what should be done to expedite the response to the INCITS negative comments.

8.3 SCSI Architecture Model - 2 (SAM-2) {Project 1157-D} [Weber]

Ralph Weber reported that resolution of the SAM-2 letter ballot comments had been completed and is available in 02-155r6. Ralph noted that SAM-2 revision 23v showing all the letter ballot comment resolutions applied to SAM-2 with change bars was also available on the T10 web site.

Ralph Weber moved that 02-155r6 be accepted as the resolution of the SAM-2 letter ballot comments and that SAM-2 rev 24, which contains the resolutions to the letter ballot comments, be forwarded to INCITS for further processing toward first public review. Mark Evans seconded the motion. The motion passed on a vote of 31:0:0:15=46.

John Lohmeyer asked the following organizations Cisco Systems, Compaq Computer, Congruent Software, Hewlett Packard, IBM, Intel, Ophidian Designs if they wished to change their No votes to Yes. All organizations present agreed to change their No votes to Yes. Conguent Software and IBM requested that their votes be changed to Yes by email.

Ralph Weber took an action item to prepare SAM-2 revision 24, from revision 23v by changing ‘working draft’ to ‘dpANS’ and removing all change bars. John Lohmeyer took an action item to forward SAM-2 revision 24 to INCITS for processing towards first public review.

14.1 Authorization of Working Group Meetings

John noted that the working group meetings are required to operate under the same voting procedures as does T10 (that is, one vote per organization) and the results of a working group are not binding on the parent committee. Ad hoc groups should strive to achieve consensus prior to bringing issues to T10.
Paul Aloisi moved that T10 authorize the T10-related meetings and events in the list above that had not previously been approved through the end of December 2002. Ron Roberts seconded the motion. In the absence of any objections, the motion passed unanimously.

15. Adjournment

The meeting was adjourned at 11:35 a.m. on Thursday September 12, 2002.
