Subj: re Call for Volunteers - Chair INCITS/T10

As a major supplier of storage products, LSI Logic Corp. is pleased to support John Lohmeyer's role as chair of the T10 Technical Committee for another 3-year term.

We recognize the importance of T10's program of work to the storage industry. This work includes the command sets and architecture for enterprise-class storage products; the protocol layers for interfaces such as Fibre Channel, IEEE 1394, and InfiniBand (tm); and the physical layers for parallel SCSI and Serial Attached SCSI.

We understand that extra workload required for this position is beyond that of a technical participant. We further recognize that this commitment is not binding should future circumstances change.

LSI Logic is U.S. domiciled with headquarters in Milipitas, CA.
