

Attendance:

Mr. Bill Martin	Emulex
Mr. Douglas Wagner	FCI
Mr. Barry Olawsky	Hewlett Packard Co.
Mr. Rob Elliott	Hewlett Packard Co.
Mr. Dan Colegrove	Hitachi Global Storage Tech.
Mr. Harvey Newman	Infineon Technologies
Mr. Kevin Witt	Maxim Semiconductor
Mr. Guillaume Fortin	PMC-Sierra
Mr. Yuming Tao	PMC-Sierra
Mr. Gourgen Oganessyan	Quellan
Mr. Alvin Cox	Seagate Technology
Mr. Allen Kramer	Seagate Technology
Mr. Bruce Johnson	Seagate Technology
Mr. Benoit Mercier	STMicroelectronics
Mr. Michael Fogg	TycoElectronics
Mr. Larry McMillan	WDC

15 in attendance

Agenda:

1. Letter ballot comment resolution:

- a. Update on receiver testing. [Witt, Newman]
Comments on reverse JTF? <http://www.t10.org/ftp/t10/document.08/08-248r0.pdf>
- b. External mini-SAS Cable keying
Gourgen Oganessyan should present Molex update on keying options.
- c. Status on update to 08-187 [Olawsky].

Receiver testing is evolving; the reverse JTF needs to be verified with lab testing.

The cable keying looks feasible but no figures available yet for review. The new reverse keys need to be located on the "bottom".

Barry has pulled the revision number and will revise 08-187 per his notes from the San Jose meeting.

Alvin has sent Rob his comment resolution thus far. Rob indicated the glossary also needs review for phy items. Areas remaining include resolution on how to reference the s-parameter files, physical receiver testing, and making JMD calibration wording to reflect informative (Annex B).

The next call in two weeks to allow time to gather additional data.

Next conference call: June 12, 2008

Toll Free Dial in Number: (877)810-9442

International Access/Caller Paid Dial In Number: (636)651-3190

PARTICIPANT CODE: 3243413

Webex information:
