InterNational Committee for Information Technology Standards (INCITS)

To: T10 Membership
From: Bob Sheffield
Subject: Minutes of T10 CAP SET PSEUDO FORMAT Teleconference – July 29, 2008

Agenda: Discuss 08-044r3 SBC-3 - Set pseudo format (a.k.a. DIF Granularity)

Attendees:

Dan Colegrove	Hitachi Global Storage Tech.
Chris Fore	NetApp
Jim Hatfield	Seagate Technology
Gerry Houlder	Seagate Technology
Kevin Marks	Dell, Inc.
Bill Martin	Emulex
Dave Peterson	Brocade
George Penokie	LSI Corp.
Pak Seto	Intel Corp.
Bob Sheffield	LSI Corp.
Ralph Weber	ENDL Texas

The meeting began at 11:00 AM MDT.

Bob Sheffield (LSI) reviewed revision-3 of 08-044 with changes reflecting feedback received at the July 17 T10 CAP WG meeting.

There was much discussion about the need for a new DIF type to describe the distribution of DIF fields through a pseudo-block when DIF fields are aligned on 512-byte boundaries with a larger pseudo-block, and also perhaps for the case where DIF fields align on pseudo-block boundaries.

It was agreed that further discussion is needed before the September T10 plenary.

Bob agreed to schedule another teleconference (to be announced on the reflector) in the interim.

The meeting adjourned at 1:00 PM MDT.
