From: Gerry Houlder, Seagate Technology <gerry.houlder@seagate.com>
Subj: Minutes of Sept. 24 Interface Power Management Telecon
Date: Sept. 25, 2008

_____

This teleconference occurred on Sept. 24, 2008 at 10:00 am CDT. The teleconference was hosted by Gerry Houlder (Seagate) and 13 attendees were recorded. Attendees were as follows:

Kevin Marks (Dell)
Mike Fitzpatrick (Fujitsu)
Dan Colgrove (Hitachi GST)
Amit Shah (Intel)
Kishore Karthikeyan (Intel)
Brian Day (LSI)
George Penokie (LSI)
Dave Uddenberg (LSI)
Mathieu Gagnon (PMC-Sierra)
Gerry Houlder (Seagate)
Mark Evans (WD)
Pak Seto
Eeloon Teoh

The agenda included:
08-206r1 – SAS-2+: Low power Transceiver Options, phy states

Mark Evans led the group through a detailed discussion of changes between rev. 0 and rev. 1 of proposal 08-206r1. Some changes were identified during the discussion, Mark recorded the comments and will put these in a new revision of the proposal.

The attendees agreed that significant progress has been made in defining both the SP and Link layer state machines over the last two telecons.

The group decided to hold another teleconference on Oct. 14 at 10:00 am CDT. Gerry Houlder will host the telecon and an email will be sent to the SCSI reflector detailing the telephone and webex details. The agenda will start with a detailed walk-through of proposal 08-015 and may include discussion of new revisions of 08-206 (SP state machine) and 08-249 (Link layer state machines) as time permits.

The teleconference ended at 11:58 am.
