- -Why should these commands become part of SPC ?
- -A common place to document a reporting mechanism for devices that change there fundamental characteristics based on the media mounted in the device.

-Other devices that could morph would be scan fax or print device. Ron/Rob Sims will present to the SCSI III working group an optional SPC Get Configuration command and the core features 0 through F. He will present the Feature information followed by the Get Configuration. The MMC group in the February joint meeting may propose to the RBC group the following recommendation:
