To: T10 Membership
From: Ralph Weber / John Lohmeyer
Subject: Minutes of T10 Plenary Meeting #33 -- September 16, 1999
Huntington Beach, CA

Agenda

1. Opening Remarks
2. Approval of Agenda
3. Attendance and Membership
   3.1 Voting procedures
4. Approval of Minutes - July ‘99 Meeting - Colorado Springs, CO (T10/99-202r1)
5. Document Distribution
6. Call for Patents
7. Review of Old Action Items
8. Project Status Reports
   8.1 Project Status Summary and NCITS Liaison [Lohmeyer]
   8.2 SCSI Common Access Method - 3 (CAM-3) Status {Project 990-D} [Dallas]
   8.3 SCSI-3 Stream Commands (SSC) Status {Project 997-D} [Peterson]
   8.4 SCSI Fibre Channel Protocol - 2 (FCP-2) {Project 1144-D} [Snively]
   8.5 SCSI Architecture Model - 2 (SAM-2) {Project 1157-D} [Weber]
   8.6 Multimedia Command Set - 2 (MMC-2) Status {Project 1228-D} [Roberts]
   8.7 SCSI Primary Commands - 2 (SPC-2) Status {Project 1236-D} [Weber]
   8.8 Reduced Block Commands (RBC) {Project 1240-D} [McLean]
   8.9 SCSI Parallel Interface - 3 (SPI-3) {Project 1302-D} [Penokie]
   8.10 MultiMedia Command Set - 3 (MMC-3) {Project 1363-D} [Roberts]
   8.11 Reduced MultiMedia Command Set (RMC) {Project 1364-D} [Roberts]
   8.12 SCSI Parallel Interface - 4 (SPI-4) {Project 1365-D} [Penokie]
   8.13 SCSI Domain Validation Technical Report (SDV) {Project ____-DT} [Lamers]
9. Old Business
   9.1 SCSI Socket/SSL Services Command Set (99-251) [Parker]
   9.2 Cable Testing Requirements (99-111r6 & 98-219r5) [Daggett/Ham]
   9.3 Resolution of SSC letter ballot comments (99-011r2) [Peterson]
10. New Business
   10.1 Report on T10 Procedures Study Group Meeting [Lohmeyer]
   10.2 Actions on Working Group Recommendations
      10.2.1 SPI-3 Table Restructuring (99-188r1) [Smith]
      10.2.2 Project Proposal for SCSI Signal Modeling TR (99-243r1) [Ham/Wallace]
      10.2.3 Project Proposal for SCSI on Scheduled Transfer (SST) (99-239r1) [Woelz/Allan]
      10.2.4 Project Proposal for SCSI VI Protocol (SVP) (99-246r1) [Gardner]
      10.2.5 SPI-3 integrity check fall back procedure (99-242r2) [Lohmeyer]
      10.2.6 Forcing Bus Free from QAS (99-274r0) [Moore]
      10.2.7 SAM-2 Tasks and Work (99-232r1) [Weber]
10.2.8   Task Management Handling Changes for SPI-3 (99-227r3) [Penokie]
10.2.9   Logical Unit Self Test (99-179r5) [Evans]
10.2.10  EXTENDED COPY Support for Persistent Reservations (99-230r1) [Weber]
10.2.11  EXTENDED COPY and Abort Task Management Functions (99-231r1) [Weber]
10.2.12  Allow WRITE BUFFER when drive is not ready (99-277r0) [Houlder]
10.2.13  SCSI Medium Changer Commands -2 (SMC-2) Project Proposal (99-218r1) [Oetting]
10.2.14  MCM Additions to Fibre Channel Control Page in FCP-2 (99-206r1) [Penokie]
10.3    Project Proposal for SCSI on Scheduled Transfer (SST) (99-239) [Ronald]

11. ISO
11.1    ISO Report [Milligan]
11.2    ISO Business [Milligan]
        11.2.1  Vote to cancel Fast Track on SBC and MMC [Milligan]
        11.2.2  Correction to SSC-2--removing extra bytes in two service actions [Penokie]

12. Liaison Reports
12.1    T11 Liaison Report [Wanamaker]
12.2    T13 Liaison Report [Milligan]
12.3    SFF Industry Group [Allan]
12.4    IEEE 1394 [Johansson]
12.5    IEEE P1285 Status
12.6    SCSI Trade Association (STA) [Jones/Aloisi]

13. Review of Action Items
14. Meeting Schedule
        14.1 Authorization of Working Group Meetings
15. Adjournment

Results of Meeting

1. Opening Remarks

John Lohmeyer, the T10 Chair, called the meeting to order at 9:00 a.m., Thursday September 16, 1999. He thanked Skip Jones of QLogic for hosting the meeting.

John said that NCITS Subgroup Membership forms and the T10 Mailing Subscription form were available on the document table. He said that people should use the NCITS forms to insure the NCITS Secretariat has the latest membership information. These forms should be mailed directly to the NCITS Secretariat.

As is customary, the people attending introduced themselves and a copy of the attendance list was circulated. Copies of the draft agenda and general information on T10 were made available to those attending.

2. Approval of Agenda

The draft agenda was approved with the following additions/changes:

10.2.2  Project Proposal for SCSI Signal Modeling TR (99-243r1) [Ham/Wallace]
10.2.3  Project Proposal for SCSI on Scheduled Transfer (SST) (99-239r1) [Woelz/Allan]
10.2.4  Project Proposal for SCSI VI Protocol (SVP) (99-246r1) [Gardner]
10.2.5  SPI-3 integrity check fall back procedure (99-242r2) [Lohmeyer]
10.2.6  Forcing Bus Free from QAS (99-274r0) [Moore]
10.2.7  SAM-2 Tasks and Work (99-232r1) [Weber]
10.2.8 Task Management Handling Changes for SPI-3 (99-227r3) [Penokie]
10.2.9 Logical Unit Self Test (99-179r5) [Evans]
10.2.10 EXTENDED COPY Support for Persistent Reservations (99-230r1) [Weber]
10.2.11 EXTENDED COPY and Abort Task Management Functions (99-231r1) [Weber]
10.2.12 Allow WRITE BUFFER when drive is not ready (99-277r0) [Houlder]
10.2.13 SCSI Medium Changer Commands -2 (SMC-2) Project Proposal (99-218r1) [Oetting]

The following agenda items were added/revised during the course of the meeting:

10.2.14 MCM Additions to Fibre Channel Control Page in FCP-2 (99-206r1) [Penokie]

3. Attendance and Membership

The membership requirements were reviewed. NCITS rules permit one vote per organization. An individual from a new organization must attend two out of three consecutive plenary meetings. He/she may apply for voting membership the second meeting via a letter to the Chair of T10. The individual may apply for membership and begin voting at anytime following adjournment of the first meeting. Typically, the individual applies for membership and start casting votes at the second plenary meeting. Working group and other ad hoc meetings do not count toward attendance requirements.

The option that allows a person attending their first meeting may become a voting member immediately following that meeting, provided their NCITS fees have been paid, permits a new member to vote on letter ballots issued between his/her first and second meetings.

To maintain membership, organizations must pay the NCITS Service Fee ($300). The ANSI International Program Fee (also $300) is billed at the same time.

There are also minimum attendance requirements to maintain voting membership on T10. If a member organization fails to attend two of the last three T10 meetings, they are warned that failing to attend the next T10 meeting would result in their membership being terminated. The Chair said he had sent letters to 13 people from 7 organizations informing them that their membership was in jeopardy due to non-attendance (see 99-009r0) and that their membership would be terminated if they did not attend this meeting. The following organizations were in attendance jeopardy:

Advansys
Ancot Corp.
Exabyte Corp.
Harting, Inc. of N. America
Lasercard Systems Corp.
Methode Electronics, Inc.
Woven Electronics

All of the organizations were present except:

Exabyte Corp.
Harting, Inc. of N. America
Lasercard Systems Corp.
Methode Electronics, Inc.
Woven Electronics
They were terminated due to lack of attendance (i.e., the principal member was changed to observer status and the first alternate member, if any, was dropped; additional alternates, if any, were changed to observers).

The following organizations requested new (or reinstated) membership:

Dell Computer

The T10 membership during the meeting was 45 organizations down from 49 organizations following the last meeting. Enclosure (1) is the list of the people present at the meeting and enclosure (2) is the current T10 membership list.

3.1 Voting procedures

John stated that NCITS had recently agreed in principal to make several changes to the NCITS rules. While the exact wording still needs to be created, the two-week rule is being clarified to say the two-week period is measured to the start of the relevant meeting. Also, documents revised at a meeting are not subject to the two-week rule provided the document being modified met the two-week rule. John stated that he will follow the intent of this new rule, allowing documents that were available two-weeks prior to the meeting to be processed even if the document is revised during a working group meeting earlier in the week.

Also the rule about not allowing abstentions on technical issues is being revised to permit abstentions provided a reason is stated. Such abstentions are not considered in calculating whether the motion met the 50% or 2/3rds voting requirements. John stated that he will be allowing abstentions as per the draft rule.

4. Approval of Minutes - July ‘99 Meeting - Colorado Springs, CO (T10/99-202r1)

The minutes were approved as written.

5. Document Distribution

Members who have any problems with their mailing subscription should deal directly with Judy Gales (jgales@itic.org) (202) 626-5741.

John Lohmeyer requested that all documents for the next mailing be in his hands in electronic format by 10:30 a.m. on Thursday September 23, 1999. Documents received after this time will go into a subsequent mailing.

John reminded the committee of the requirements for document submission. Since T10 meets its document retention requirements by preparing mailings, documents included in the mailing must be suitable for archiving. This means that native-format and/or Portable Document Format (PDF) electronic originals with proper identification must be submitted.

The electronic copies can be sent directly to John by email (at lohmeyer@t10.org), or they can be transferred by ftp protocol to ftp.t10.org and placed in the /incoming directory. In the latter case, please also send email to John informing him of the file name and location of the file.

Minutes are available on the T10 World Wide Web page (see below), and are distributed to the T10 Reflector.

To be added to the T10 Reflector, send an email to majordomo@t10.org with the line ‘subscribe t10’ in the message body. The NCITS Secretariat maintains a World Wide Web page at http://www.ncits.org/. LSI Logic maintains a World Wide Web page on behalf of T10 on a server provided by the SCSI Trade Association at:
http://www.t10.org/

The current document register is enclosure (3). The T10 document register is also available at:

ftp://ftp.t10.org/t10/dr.txt

6. Call for Patents

This is a regular agenda item to identify any potential patent issues with developing standards and technical reports.

A document is available from ANSI, "Procedures for the Development and Coordination of American National Standards", at no charge. This document is also on the WWW at http://www.ncits.org/help/ansi_sdo.html. Section 1.2.11 contains the ANSI patent policy. Amy Marasco manages patent issues for ANSI and can be contacted at amarasco@ansi.org or 212-642-4954.

A call for patents was made. There were no responses.

7. Review of Old Action Items

312) Ralph Weber will review editorially the second sentence of item c in clause 5.3.2.5.3. Complete
313) John Lohmeyer will arrange a meeting to discuss changes and updates in the T10 procedures. Complete
319) Gene Milligan will submit a NWIP and a CD contribution for RBC to ISO/IEC for consideration. Carryover
321) Ron Roberts will prepare RBC revision 10a incorporating the ANSI pre-edit for forwarding to second public review. Complete
322) John Lohmeyer will forward RBC revision 10a to second public review. Complete
323) John Lohmeyer will send a letter to Ralph Weber formally responding to his RBC public review comments. Complete
324) John Lohmeyer will notify NCITS that T10 recommends the withdrawal X3.276:1997 SCSI-3 Controller Commands. Complete
325) John Lohmeyer will notify NCITS that T10 recommends the withdrawal of X3.253:1995 SCSI-3 Parallel Interface & its Amendment. Complete
326) John Lohmeyer will notify NCITS that T10 recommends the withdrawal of X3.292:1997 SCSI-3 Interlocked Protocol. Complete
327) John Lohmeyer will notify NCITS that T10 recommends the withdrawal of X3.277:1996 Fast-20. Complete
328) John Lohmeyer and Larry Lamers will provide the SPI-3 editor with the electronic information used to include the dedication in SPI. Carryover
329) George Penokie will include the SPI dedication in SPI-3. Complete
330) John Lohmeyer will forward MMC-2 revision 11 to NCITS for processing toward first public review. Complete
331) John Lohmeyer will forward 99-214r1 to NCITS for processing as a project proposal for a technical report on Domain Validation. Complete
332) Gene Milligan will handle the international approval of DIS 14776-342 (SCC-2) as presented. Complete
333) Gene Milligan will process the international withdrawal of the SIP project. Complete
334) Gene Milligan will initiate fast track processing of NCITS:325:1998 (SBP-2). Carryover
335) Gene Milligan will create an NWI and CD contribution for MMC-2 revision 11. Carryover
336) Ron Roberts (or John Lohmeyer) will give RBC revision 10a to the IR in source and PDF format. Carryover
337) Ron Roberts (or John Lohmeyer) will give MMC-2 revision 11 to the IR in source and PDF format. Carryover
338) Larry Lamers will request minutes for the June CAM-3 review meeting from Bill Dallas. Carryover
339) Ralph Weber will add an SPC-2 version descriptor for MMC-2 revision 11. Complete
8. Project Status Reports

8.1 Project Status Summary and NCITS Liaison [Lohmeyer]

John Lohmeyer said that the current T10 project status summary was included in the T10 Information Packages distributed prior to the meeting and will be included in the mailing as usual.

8.2 SCSI Common Access Method - 3 (CAM-3) Status {Project 990-D} [Dallas]

In the absence of Bill Dallas, no report was presented.

8.3 SCSI-3 Stream Commands (SSC) Status {Project 997-D} [Peterson]

Erich Oetting informed the committee that it is expected that the SSC letter ballots will be resolved by the November meeting.

8.4 SCSI Fibre Channel Protocol - 2 (FCP-2) {Project 1144-D} [Snively]

Bob Snively reported that the next FCP-2 meeting will be on Monday of the T11 meeting week. He described 99-247 that contains changes planned for inclusion in FCP-2 revision 3, which will be ready for presentation at the meeting in October. Bob noted that the target date for FCP-2 letter ballot is following the November committee meeting.

8.5 SCSI Architecture Model - 2 (SAM-2) {Project 1157-D} [Weber]

Ralph Weber reported that SAM-2 revision 11 had been prepared following the July meeting and contained all committee approved changes to that date. SAM-2 revision 12 will be prepared following this meeting in time for the committee mailing. Since the committee plan is to forward SAM-2 for public review in May 2000, Ralph proposed that major SAM-2 enhancements be limited to completion of the SCSI Multi-port Unit definition and that other major SAM-2 plans be deferred to SAM-3, for which Ralph will bring a new project proposal to the November meetings.

8.6 Multimedia Command Set - 2 (MMC-2) Status {Project 1228-D} [Roberts]

Ron Roberts reported that MMC-2 is in public review and the review ends on 24 October. Ron noted that some public review comments are expected to be submitted from the working group.

8.7 SCSI Primary Commands - 2 (SPC-2) Status {Project 1236-D} [Weber]

Ralph Weber reported that SPC-2 revision 11 had been prepared following the July meeting and contained all committee approved changes to that date. SPC-2 revision 12 will be prepared following this meeting in time for the committee mailing. Since the committee plan is to forward SPC-2 for public review in May 2000, Ralph proposed that major SPC-2 enhancements be limited to completion of the EXTENDED COPY command definition and the SCSI Multi-port Unit definition and that other major SPC-2 plans be deferred to SPC-3, for which Ralph will bring a new project proposal to the November meetings. Ralph noted that the major work deferred out of SPC-2 by this proposal would be the read/write attributes commands and the access controls commands.

8.8 Reduced Block Commands (RBC) {Project 1240-D} [McLean]

John Lohmeyer reported that RBC is in second public review closing 7 November.
8.9 SCSI Parallel Interface - 3 (SPI-3) {Project 1302-D} [Penokie]

George Penokie reported that SPI-3 revision 9 was made available a couple of weeks ago. He explained that revision 10 will be made available following this meeting and will contain all changes approved at this meeting. He stated that a letter ballot to approve forwarding to first public review will be conducted on SPI-3 revision 10.

Ralph Weber took an action item to create a version descriptor entry for SPI-3 revision 10 in SPC-2.

8.10 MultiMedia Command Set - 3 (MMC-3) {Project 1363-D} [Roberts]

Ron Roberts reported that MMC-3 has received input from Mt. Fuji-4 on DVD and streaming commands. He stated that the goal is to create a first revision in time for the November meetings. At the November meeting, Mr. McFaran from Philips will take over leadership of the MMC-3 project.

Ralph Weber took an action item to add MMC-3 (project 1363-D) to the version descriptors list in SPC-2.

8.11 Reduced MultiMedia Command Set (RMC) {Project 1364-D} [Roberts]

Ron Roberts reported that RMC takes the 55 commands in MMC and drops them down to 20. He stated that the goal is to create a first revision in time for the November meetings. At the November meeting, Mr. McFerrin from Philips will take over leadership of the RMC project.

Ralph Weber took an action item to add RMC (project 1364-D) to the version descriptors list in SPC-2.

8.12 SCSI Parallel Interface - 4 (SPI-4) {Project 1365-D} [Penokie]

George Penokie reported that the first SPI-4 presentations were made at the SCSI Physical Working Group (minutes in 99-267). He stated that no SPI-4 working draft documents are expected for three to five months, while the proposals are reviewed and refined, unless the needs of the cable working group require a working draft sooner.

Ralph Weber took an action item to add SPI-4 (project 1365-D) to the version descriptors list in SPC-2.

8.13 SCSI Domain Validation Technical Report (SDV) {Project ____-DT} [Lamers]

Larry Lamers reported that Tariq Abou-Juyab has volunteered to edit the document. He asked the chair to consider accepting the editor candidate. John Lohmeyer reported that the NCITS web site does not show a project number for SDV yet, but he expects one to be assigned soon.

9. Old Business

9.1 SCSI Socket/SSL Services Command Set (99-251) [Parker]

John Lohmeyer reported that Keith Parker made a presentation to the SCSI Working Group (minutes in 99-268).

9.2 Cable Testing Requirements (99-111r6 & 98-219r5) [Daggett/Ham]

John Lohmeyer reported that the working group unanimously recommended that 99-111r6 and 98-219r5 be incorporated in SPI-3. Based on the working group recommendation, Bill Ham moved that 99-111r6 (Recommendations for content in SPI-3 Relating to Cable Performance) and 98-219r5 (Cable Media Performance Testing) be incorporated in SPI-3. Jay Neer seconded the motion. Jie Fan invoked the two-week rule and action on the motion was withdrawn since these documents had not been available two weeks.
Bill Ham moved that 99-111r4 (Recommendations for content in SPI-3 Relating to Cable Performance) and 98-219r4 (Cable Media Performance Testing) be incorporated in SPI-3. Ed Gardner seconded the motion. Jie Fan stated that 99-111r4 is not complete and will not match 98-219r4. Bill Ham stated everything since 99-111r4 and 98-219r4 is substantially editorial. Paul Aloisi supported Bill's position. Ed Gardner asked about the history of the revisions and suggested an interpretation of the two-week rule to allow the most recent documents to be voted on. The Chair declined to use Ed's interpretation as he felt it would set a bizarre precedent.

Bob Snively questioned the process by which the new revisions were generated. Bill Ham explained that the cable working group received comments from Madison and reviewed the comments. He noted that the group rejected most of the comments. Jie explained that she never received a specific response to the comments. Bill noted that Jie was not present at the working group meeting where the comments were discussed.

Dal Allan questioned the use of procedural methods to block activities of the working groups. Bob Snively stated that he would have to vote against the motion because the documents named in the motion are not the documents recommended by the working group.

The motion to incorporate 99-111r4 and 98-219r4 passed 20:7:3:15=45.

9.3 Resolution of SSC letter ballot comments (99-011r2) [Peterson]

Erich Oetting reported that action on the SSC letter ballot should be deferred to the November meeting.

10. New Business

10.1 Report on T10 Procedures Study Group Meeting [Lohmeyer]

John Lohmeyer reported that a procedures study group meeting was held on Monday of this week.

The group spent most of the time available reviewing 99-271r0 (Proposed revision to T10 Electronic Procedures), which John had prepared to supercede 95-146r2, the currently approved T10 Electronic Procedures. John said that 99-271r1 will be on the agenda for the November meetings.

Another T10 Procedures Study Group meeting is requested for Monday morning, November 1, 1999 in Monterey, CA.

10.2 Actions on Working Group Recommendations

10.2.1 SPI-3 Table Restructuring (99-188r1) [Smith]

Gene Milligan moved that 99-188r1 be approved for inclusion in SPI-3. Larry Lamers seconded the motion. The motion passed 17:1:9:18=45. Paul Aloisi stated that his negative vote was based on the opinion that the restructuring of the information was unnecessary.

10.2.2 Project Proposal for SCSI Signal Modeling TR (99-243r1) [Ham/Wallace]

Larry Lamers requested when the proposal was posted on the web site. Bill Ham explained that the document failed to meet the two week rule. John Lohmeyer asked that consideration be deferred to the November meeting, since the document does not yet exist.

10.2.3 Project Proposal for SCSI on Scheduled Transfer (SST) (99-239r1) [Woelz/Allan]

Neil Wanamaker moved that 99-239r1 be forwarded to NCITS for processing as a new project request for the SCSI on Scheduled Transfer (SST) standard. Dal Allan seconded the motion. The motion passed 32:0:0:13=45.
John Lohmeyer took an action item to forward 99-239r1 to NCITS for processing as a new project request for the SCSI on Scheduled Transfer (SST) standard.

10.2.4 Project Proposal for SCSI VI Protocol (SVP) (99-246r1) [Gardner]

Ed Gardner stated that the project proposal would be subject to the two week rule. Larry Lamer invoked the two week rule. Action on the proposal was deferred to the November meeting.

10.2.5 SPI-3 integrity check fall back procedure (99-242r2) [Lohmeyer]

George Penokie reported that the working group recommended approval of the proposal on a vote of 12:1:1. John Lohmeyer described the proposal. Larry Lamers requested that a definition of expander be added to the SPI-3 glossary and George Penokie agreed to added the glossary definition.

10.2.6 Forcing Bus Free from QAS (99-274r0) [Moore]

Rob Elliott described the contents of the proposal, which provides a method for a QAS initiator to force a transition to bus free phase. Rob Elliott moved that 99-274r0 (Forcing a Bus Free from QAS) be approved for inclusion in SPI-3. Larry Lamers seconded the motion. The motion passed 26:0:2:17=45.

10.2.7 SAM-2 Tasks and Work (99-232r1) [Weber]

10.2.8 Task Management Handling Changes for SPI-3 (99-227r3) [Penokie]

George Penokie moved that 99-227r3 (Task Management Handling Changes for SPI-3) be approved for inclusion in SPI-3. Jeff Williams seconded the motion. The motion passed 31:0:0:14=45.

10.2.9 Logical Unit Self Test (99-179r5) [Evans]

Mark Evans moved that 99-179r5 (Logical Unit Self Test) be approved for inclusion in SPC-2. George Penokie seconded the motion. The motion passed 31:0:0:14=45.

10.2.10 EXTENDED COPY Support for Persistent Reservations (99-230r1) [Weber]

Ralph Weber moved that 99-230r1 (EXTENDED COPY Support for Persistent Reservations) be approved for inclusion in SPC-2. Larry Lamers seconded the motion. The motion passed 30:0:0:15=45.

10.2.11 EXTENDED COPY and Abort Task Management Functions (99-231r1) [Weber]

Ralph Weber moved that 99-231r1 (EXTENDED COPY and Abort Task Management Functions) be approved for inclusion in SPC-2. Erich Oetting seconded the motion. The motion passed 31:0:0:14=45.

10.2.12 Allow WRITE BUFFER when drive is not ready (99-277r0) [Houlder]

Gene Milligan moved that 99-277r0 (Allow WRITE BUFFER when drive is not ready) be approved for inclusion in SPC-2. Paul Aloisi seconded the motion. The motion passed 27:1:0:17=45. Bob Snively stated that his negative vote was based on concerns over initiators will overwrite microcode without holding a cooperating reservation.
10.2.13 SCSI Medium Changer Commands -2 (SMC-2) Project Proposal (99-218r1) [Oetting]

Ed Gardner noted that the submittal date should be changed to today. Gene Milligan noted that the ISO references should include SMC. Erich Oetting moved that 99-218r2 be forwarded to NCITS for processing as a new project request for the SCSI Medium Changer Commands -2 (SMC-2) standard. Paul Aloisi seconded the motion. The motion passed 30:0:0:15=45.

Erich Oetting took an action item to provide a revised document to John Lohmeyer. John Lohmeyer took an action item to forward 99-218r2 to NCITS for processing as a new project request for the SCSI Medium Changer Commands -2 (SMC-2) standard.

10.2.14 MCM Additions to Fibre Channel Control Page in FCP-2 (99-206r2) [Penokie]

10.3 Project Proposal for SCSI on Scheduled Transfer (SST) (99-239) [Ronald]

This item was handled under agenda item 10.2.3 above.

11. ISO

11.1 ISO Report [Milligan]

Gene Milligan reported that the technical editors have fallen an additional two months behind in completing the resolution of comments.

11.2 ISO Business [Milligan]

11.2.1 Vote to cancel Fast Track on SBC and MMC [Milligan]

Larry Lamers moved that T10 request that the JTC1 TAG withdraw the ISO fast tracking of SBC. Erich Oetting seconded the motion. The motion passed 27:1:0:17=45.

Larry Lamers moved that T10 request that the JTC1 TAG cancel the ISO fast tracking of MMC. Bob Snively seconded the motion. The motion passed 22:2:2:19=45.

11.2.2 Correction to SCC-2--removing extra bytes in two service actions [Penokie]

George Penokie reported that, in SCC-2 table 52, the bytes 6 through 9 labelled reserved should be removed since they are duplicates of the length bytes elsewhere in the table. Similarly, the bytes 6 through 9 labelled reserved in table 47 should be removed.

George Penokie moved that the IR be instructed to submit a U.S. recommended vote approving the SCC-2 DIS with a comment stating that the bytes labelled reserved in tables 47 and 52 should be removed because of the duplicate length bytes elsewhere in the tables. Ralph Weber seconded the motion. The motion passed 26:0:0:19=45.

George Penokie noted that his intent is to substitute the ISO version of SCC-2 for the ANSI version of SCC-2 after the ISO version is approved. This would correct the U.S. version of SCC-2.
12. Liaison Reports

12.1 T11 Liaison Report [Wanamaker]

The T11 liaison report was provided to the committee electronically as 99-280r0. Neil Wanamaker presented the report to the committee.

12.2 T13 Liaison Report [Milligan]

Gene Milligan made an oral report to the committee and provided the following electronic report for the minutes.

The T13 August, 1999 meeting was hosted by Pete McLean of Maxtor at the Hotel Boulderado.

The ATA/ATAPI-5 Project 1321D draft was reviewed. Ultra ATA Implementation Guide (D98109r1) was reviewed and will be revised to reflect the suggested changes. ATA/ATAPI-5 will be changed to correct the state of REL after a data transfer in Read DMA and Write DMA and change state diagram pointers for Read and Write DMA.

The self-test description (DST) was changed so that Self-Test may end when the test finds a test element that does not pass the test criteria.

The ATA/ATAPI-5 Draft letter ballot is planned to follow the 10/99 meeting.

The BIOS draft standard EDD v3.0 Project 1386-D revision 1 document was reviewed. Curtis Stevens will turn a revision showing the agreed changes with change bars.

Address Offset Feature Technical Report Project 1407-DT draft revision 0 was distributed for review.

The Method for Booting Reserved Area Boot Code Project 1367-D draft was reviewed. Curtis Stevens will turn a revision with the suggested changes.

The Really Big LBA (D98142r2) proposal was reviewed. Queuing with mixed 28 bit addresses and 64 bit addresses will be prohibited. Various scenarios of register writes and mode switches were discussed.

The AV proposals from Seagate and Western digital (D99123r1 and D99128r0) were discussed.

An expansion of the SMART Error Log (D99121R0) for Log Address 02h in ATA/ATAPI-6 was approved.

Multiword DMA timing diagrams will be reviewed at the October meeting.

Dan Colegrove of IBM has agreed to contribute to an ATA/ATAPI Implementer's Guide.

The 8 bit data ordering will be added back in to ATA/ATAPI-5. An 8 Bit related Set Features will be changed from retired to obsolete in ATA/ATAPI-5. Both of these changes are needed for CFA and other hand held applications. D99126r0 documents reserved codes for future CFA commands, Set Features functions and Identify drive data.

There is a conflict between the way Byte Count is presently specified for ATAPI devices with the way a major operating system uses ATAPI tape devices. This change to the Identify Packet command adds a mode indicator so hosts can determine which way the device is configured. The configuration is controlled by a SCSI command (presently vendor unique) transported by the Packet command.

The group agreed to continue to discuss partition tables at the meetings and on the reflector. Robert Raymond agreed to produce a paper for discussion.
IDEMA is developing a standard on power efficiency in response to Japanese power consumption restrictions on disk drives. A rating based upon Joules per IOPS is being evaluated. The next meeting will be at the IDEMA office in the San Clara on November 5 at 9:30am. For more information contact Kristen Montan <kmontan@idema.org>.

A video issues working group was scheduled for October 1, 1999 in Las Vegas, Nevada. The next plenary meeting of T13 is 19-22 October hosted by Quantum at the Wailea Outrigger Hotel in Wailea, Maui, Hawaii.

12.3 SFF Industry Group [Allan]

Dal Allan provided the following electronic report for the minutes:

The round robin HSS (High Speed Serial) Testing for copper cables at Clarilion uncovered a need to make minor changes to the specification.

The issues on HSSDC (High Speed Serial Data Connector) were resolved and the IEC draft and SFF-8420 are now close companions.

The 80-pin Fibre Channel SCA-2 tape connector will be restricted to 5 1/4" form factors only to avoid the risk of damage to existing disk products in the 3 1/2" form factor.

Jerry Kachlic presented a prototype of a 100-pin SCA and the question was raised on the requirement to retain the Advanced Ground Contacts in the guides. A worst case tolerance shows that first contact by the guides is not ensured and an investigation will check on whether the connector worst case plus the guidance requirements does ensure the guides make first contact.

A mismatch between the nominal specs on launch power between FC-PH-3 and the GBIC SFF-8053 will be addressed by Bill Ham and Bob Snively.

12.4 IEEE 1394 [Johansson]

Larry Lamers reported that 1394a has closed its ballot and passed with revisions. Gene Milligan reported that the revisions have been made.

12.5 IEEE P1285 Status

No report.

12.6 SCSI Trade Association (STA) [Jones/Aloisi]

The STA liaison report was provided to the committee electronically as 99-281r0. Paul Aloisi presented the report to the committee.

The committee discussed the STA plans to develop ease of use documents for servers and the desktop.

In response to a question, Paul stated that the STA patent policy will be presented to the STA Board of Directors later in the day.

13. Review of Action Items

319) Gene Milligan will submit a NWIP and a CD contribution for RBC to ISO/IEC for consideration.
328) John Lohmeyer and Larry Lamers will provide the SPI-3 editor with the electronic information used to include the dedication in SPI.
335) Gene Milligan will create an NWIP and CD contribution for MMC-2 revision 11a.
336) Ron Roberts (or John Lohmeyer) will give RBC revision 10a to the IR in source and PDF format.
337) Ron Roberts (or John Lohmeyer) will give MMC-2 revision 11a to the IR in source and PDF format.
338) Larry Lamers will request minutes for the June CAM-3 review meeting from Bill Dallas.
341) Ralph Weber took will create a version descriptor entry for SPI-3 revision 10 in SPC-2.
342) Ralph Weber will add MMC-3 (project 1363-D) to the version descriptors list in SPC-2.
343) Ralph Weber will add RMC (project 1364-D) to the version descriptors list in SPC-2.
344) Ralph Weber will add SPI-4 (project 1365-D) to the version descriptors list in SPC-2.
345) John Lohmeyer will forward 99-239r1 to NCITS for processing as a new project request for a SCSI on Scheduled Transfer (SST) standard.
346) Erich Oetting will provide 99-218r2, a revised new project request for the SCSI Medium Changer Commands -2 (SMC-2), to John Lohmeyer.
347) John Lohmeyer will forward 99-218r2 to NCITS for processing as a new project request for a SCSI Medium Changer Commands -2 (SMC-2) standard.

14. Meeting Schedule

The next plenary meeting of T10 will be November 4, 1999 in Monterey, CA at the Embassy Suites on Monterey Bay (831-393-1115), hosted by Adaptec. The meeting will begin at 9:00 a.m. on Thursday.

The meeting list for the next plenary week is:
### November '99 Meeting Map

Meeting Map Abbreviation Key:

- **Amnd:** Amendment
- **Cable Perf.:** Cable Performance Testing
- **CAM:** Common Access Method
- **CAM-3:** Next generation CAM for SCSI-3
- **EPI:** SCSI Enhanced Parallel Interface (Technical Report)
- **Fast-20:** Data Transfer at 20 Mega-transfers/second (a.k.a., Ultra)
- **Fast-40:** Data Transfer at 40 Mega-transfers/second (a.k.a., Ultra2)
- **Fast-80:** Data Transfer at 80 Mega-transfers/second (a.k.a., Ultra3)
- **FC:** Fibre Channel
- **FC-AL:** Fibre Channel - Arbitrated Loop (a T11 project)
- **FCLC:** Fibre Channel Loop Community (not an NCITS activity)
- **I/F:** Interface
- **HAP:** High Availability Profile (Technical Report)
- **LB:** Letter Ballot
- **MMC-2:** Multimedia Commands - 2 (CD-ROM, DVD, etc.)
- **OBD_T:** Object-Based Device Tutorial
- **PH:** Physical (Connectors, Cables, Transceivers, etc.)
- **Plenary:** Full Committee Meeting
- **RAID:** Redundant Array of Independent Devices
- **RBC:** Reduced Block Commands
- **SBC:** SCSI-3 Block Commands
- **SBP-2:** Serial Bus Protocol for IEEE 1394 (2nd generation protocol)
- **SCC-2:** SCSI Controller Commands - 2 (2nd generation RAID command set)
- **SCSI:** Small Computer System Interface
- **SES:** SCSI Enclosure Services
- **SCSI Harbor:** A STA project on defining a wrapper for SCSI devices
- **SFF:** SFF Industry Group (not an NCITS activity)
- **SG:** Study Group
- **SMC:** SCSI-3 Medium Changer Commands
- **SPC-2:** SCSI Primary Commands - 2 (2nd generation)
- **SPI-2:** Second Generation SCSI Parallel Interface
- **SPI-3:** Third Generation SCSI Parallel Interface
- **SSA:** Serial Storage Interface
- **SSC:** SCSI-3 Stream Commands (includes Tape)
- **SSWGs:** Specific-Subject Working Groups
- **STA:** SCSI Trade Association (not an NCITS activity)
- **STA Tech:** STA Technical Meeting (T10 members invited)
- **T10:** Lower Level Interfaces Technical Committee
- **T10 Proc.:** T10 Procedures
- **WG:** Working Group (same as Ad Hoc Group)
For more information about T10 activities, please contact the following people:

14.1 Authorization of Working Group Meetings

John noted that the working group meetings are required to operate under the same voting procedures as does T10 (that is, one vote per organization) and the results of a working group are not binding on the parent committee. Ad hoc groups should strive to achieve consensus prior to bringing issues to T10.

Erich Oetting moved that T10 authorize the T10-related meetings and events in the list above. Paul Aloisi seconded the motion. The motion passed 18:1:1:25=45. Gene stated that his no vote was based on the schedule conflict between the SPI-4 and NCITS meetings.

Bill Ham asked that authorized ad hoc meetings be given document numbers for minutes upon authorization. John asked that discussion of the topic be deferred to the next procedures study group meeting.

Dal Allan asked the committee to confirm that only two meeting tracks will be needed in January 2000. The following plan for two meeting tracks was discussed by the group.
