RE : Working Draft of the Enhanced Small Computer System
Interface (SCSI-2)

As you are probably aware a working group of our standards committee is investigating the feasibility of using SCSI as a local interconnect between devices and systems in the same room. Towards that end could you please provide me with a copy of your most recent draft of SCSI-2? I would like to make copies and distribute them to our people for background before our November 18-20 meetings.

Our Committee is also interested in investigating a more formal liaison relationship with X3T9.2 and other appropriate X3 Subcommittees. I will be discussing how to approach this with Catherine Kachurik shortly.
