Dear Mr. Rinehuls,

I appreciate the comments submitted on the draft proposed ANS, Enhanced Small Device Interface (X3T9.2/87-005, Revision 2). The disposition of your comments is as follows:

Table 5-1	Corrected	Table 7-20	Deliberately skipped
Section 6.2.1		Table 7-26	N/A
- 6.2.5	N/A	Figure 10-3	N/A
Table 7-4	Deliberately skipped	Figure 10-6	N/A
Table 7-10	Corrected	Figure 10-16	N/A
Table 7-15	Deliberately skipped	Figure 10-18	N/A
Table 7-16	Deliberately skipped	Figure 10-20	N/A
Section 7.7.3	Corrected	Figure 10-22	N/A

The phrase "deliberately skipped" applies to the Table numbers which were known to have gaps. As the ANSI editor changes the table numbers from section-number to continuous from the beginning of the document, it was decided not to attempt drastic renumbering throughout the whole document on table numbers that would change anyway. There should have been no cross references to the absent tables, and I have corrected the cross references in Section 5.6 and Section 7.6.

N/A is used for the sections, tables and figures which are missing from your document but not from mine. I have checked the copy distributed by X3T9.2 dated 4/29/88 as well as the disk files.

Please call me at 408-867-6630 to see if we can unravel the mystery.

Yours sincerely,

I. Dal Allan

SUBJECT: Draft Proposed ANS, Enhanced Small Device Interface (X3T9.2/87-009;
Revision 2)

Dear Cathie:

We have reviewed subject proposed ANS, currently undergoing public review. We cannot recommend its adoption since the document is not complete enough to evaluate.

Specifically, following is a list of Sections, Tables and Figures missing from the document:

- | | |
|-----------------------|--|
| ✓ Table 5-1 | Referenced in Section 5.6 |
| Section 6.2.1 - 6.2.5 | Referenced in Section 6.3.1 |
| Table 7-4 | |
| ✓ Table 7-10 | Referenced in Section 7.6 |
| Table 7-15 | |
| Table 7-16 | |
| ✓ Section 7.7.3 | |
| Table 7-20 | |
| Table 7-26 | Referenced in Section 18 |
| Figure 10-3 | Referenced in Section 6.2.7 |
| Figure 10-6 | Referenced in Section 6.3.6 |
| Figure 10-16 | Referenced in Sections 8.3.4.1 and 8.4.5 |
| Figure 10-18 | Referenced in Section 9 and 9.4.1 |
| Figure 10-20 | Referenced in Section 9.2.2 |
| Figure 10-22 | Referenced in Section 9.2.2 |

Since the technical specifications are not complete, we feel that the draft must be revised and reviewed again for its technical suitability before it can be supported as a viable solution to a standardization problem.

Please forward these comments to Committee X3T9 for their consideration.

Sincerely

WILLIAM C. RINEHULS
GSA Member
Committee X3
